- + Packing tape (2+ rolls)

- + Brown + black markers or paint
- + String or yarn for rope rigging
- + Paper or light cardboard for sails
- + Ruler or tape measure

FUN FACT!

Real pirate ships were called galleons. Blackbeard's ship was called Queen Anne's Revenge!

CHALLENGE!

Crew challenge: add a working drawbridge! Cut the front of the hull so it folds down like a real gangplank.

BUILD GUIDE — CARDBOARD PIRATE SHIP

1 STEP 1: FLATTEN & PLAN

Open and flatten all 4–5 boxes. Keep one sealed for the hull floor. Lay all pieces out to plan before cutting anything.

2 STEP 2: CUT THE HULL SIDES

! ADULT ASSIST NEEDED

Cut 2 Hull Side pieces (36" × 24" (91 × 61 cm)). Score a gentle curved arc along the bottom edge (cut line shown on template) — this gives it a real ship shape. Stack both and compare — they must match.

SAFETY: Adult uses box cutter. Kids trace the cut line first with pencil.

3 STEP 3: ASSEMBLE THE HULL

! ADULT ASSIST NEEDED

Stand both hull sides upright, 16" (41 cm) apart. Lay the Hull Bottom connecting them at the base. Tape all inside seams with 3+ overlapping tape strips. Sit a child inside to test — add more tape until it holds steady.

SAFETY: Two people needed — one holds panels, one tapes corners.

4 STEP 4: ADD BOW & STERN

Tape the Bow piece to the front — pointed end forward. Tape the Stern Platform across the top rear of both hull sides. The captain stands on the stern.

5 STEP 5: BUILD THE MAST

! ADULT ASSIST NEEDED

Lay the Mast Strip flat (48" × 8" (122 × 20 cm)). Roll it tightly from the short edge — see the (roll) roll arrow on the template. Tape every 2 inches as you roll. When done, tape the full seam. Stand it center-ship. Cross-tape the base in an X to hold it upright.

SAFETY: Two people to hold mast upright while taping the base brace.

6 STEP 6: MOUNT SPARS & SAILS

Tape both Spars horizontally to the mast — one at the top, one 12" (30 cm) below. The fold marks on the template show the center balance point. Tape the Large Sail to the lower spar, Small Sail to the upper. Draw a skull & crossbones on the large sail.

7 STEP 7: MOUNT CANNONS

Roll each Cannon Strip into a short fat tube ((roll) arrow on template). Poke a hole in each hull side wall and push a cannon through, angling outward. Tape from inside.

8 STEP 8: STRING THE RIGGING

Run string from the mast top down to the bow and stern. Add strings between spars. Pull taut and tape each end down. This is what makes it look like a real ship.

9 STEP 9: DECORATE

Draw wood plank lines in brown across the hull sides. Add a Jolly Roger flag at the mast top. Name your ship on the bow.

10 STEP 10: QUALITY CHECK

Child sits inside hull — holds their weight. Mast stands. Sails visible. Cannons mounted. Rigging strung. Compare to cover photo. That's the standard.

QUALITY CHECK!

Does your build match the cover photo? Compare side by side before you call it done.
