HEE-BOT MARK 1 — WEARABLE ROBOT SUIT

Full-Body Wearable Cardboard Robot — 7-Piece Suit

Build a full wearable robot suit. HEE-BOT Mark 1 — activate.

AGES 5–12	BOXES 3–4 Medium Boxes	TIME 2–2.5 Hours	DIFF Intermediate **	PIECES 7 pcs
--------------	---------------------------	---------------------	-------------------------	-----------------

CARDBOARD NEEDED:
3–4 Medium Boxes (at least 18" × 24" (46 × 61 cm) each)

MISSION GOAL:
Build and wear a complete 7-piece robot suit: head, chest, back, 2 arm tubes, 2 claw hands, 2 shin guards, antenna. ALL SILVER.

ROBOT HEAD (SMALL BOX)

12" x 12" (30 x 30 cm) | Cut x1

CUT
x1

ROBOT HEAD (SMALL BOX)

x1

VISOR: cut wide horizontal opening at eye level (2" tall x 8" wide). Adult only.

MOUTH GRILL: cut narrow horizontal slot below visor

12" x 12" (30 x 30 cm)
Box fits over head — cut visor + mouth

MARK LEGEND FOR THIS PIECE:

CUT — scissors or box cutter on this line

NOTE: Box fits over head — cut visor + mouth

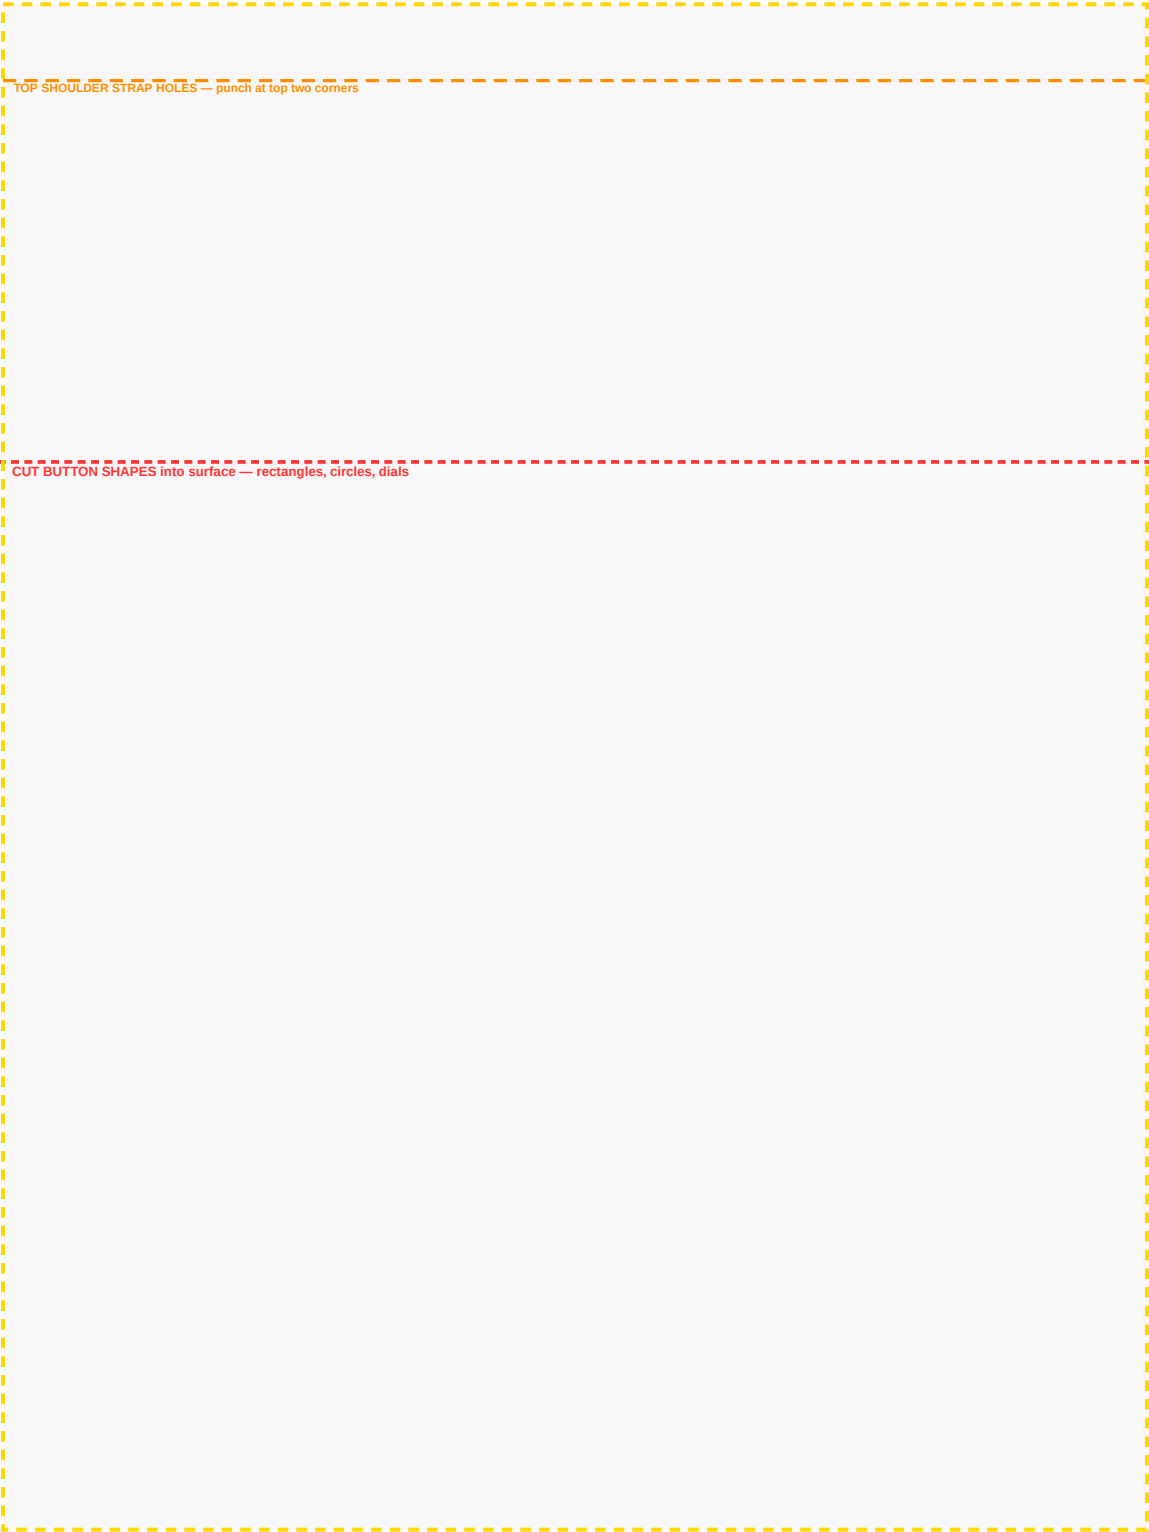

CHEST FRONT PANEL

12" x 16" (30 x 41 cm) | Cut x1

CUT
x1

CHEST FRONT PANEL

x1

MARK LEGEND FOR THIS PIECE:

CUT — scissors or box cutter on this line	FOLD — score lightly, then fold at this line
---	--

NOTE: Control panel face — buttons, dials

CHEST BACK PANEL

12" x 16" (30 x 41 cm) | Cut x1

CUT
x1

CHEST BACK PANEL

x1

SHOULDER STRAP HOLES — matches front panel

12" x 16" (30 x 41 cm)
Matches front — add strap holes

MARK LEGEND FOR THIS PIECE:

FOLD — score lightly, then fold at this line

NOTE: Matches front — add strap holes

ARM TUBE STRIP

10" x 10" (25 x 25 cm) | Cut x2

CUT
x2

ARM TUBE STRIP

x2

MARK LEGEND FOR THIS PIECE:

SCORE — press hard with ruler but do NOT cut through	ROLL — roll the cardboard tightly in this direction
--	---

NOTE: Wrap around upper arm

PIECE D: ARM TUBE STRIP | HEE-BOT MARK 1 — WEARABLE ROBOT SUIT | Presented by The High End

E

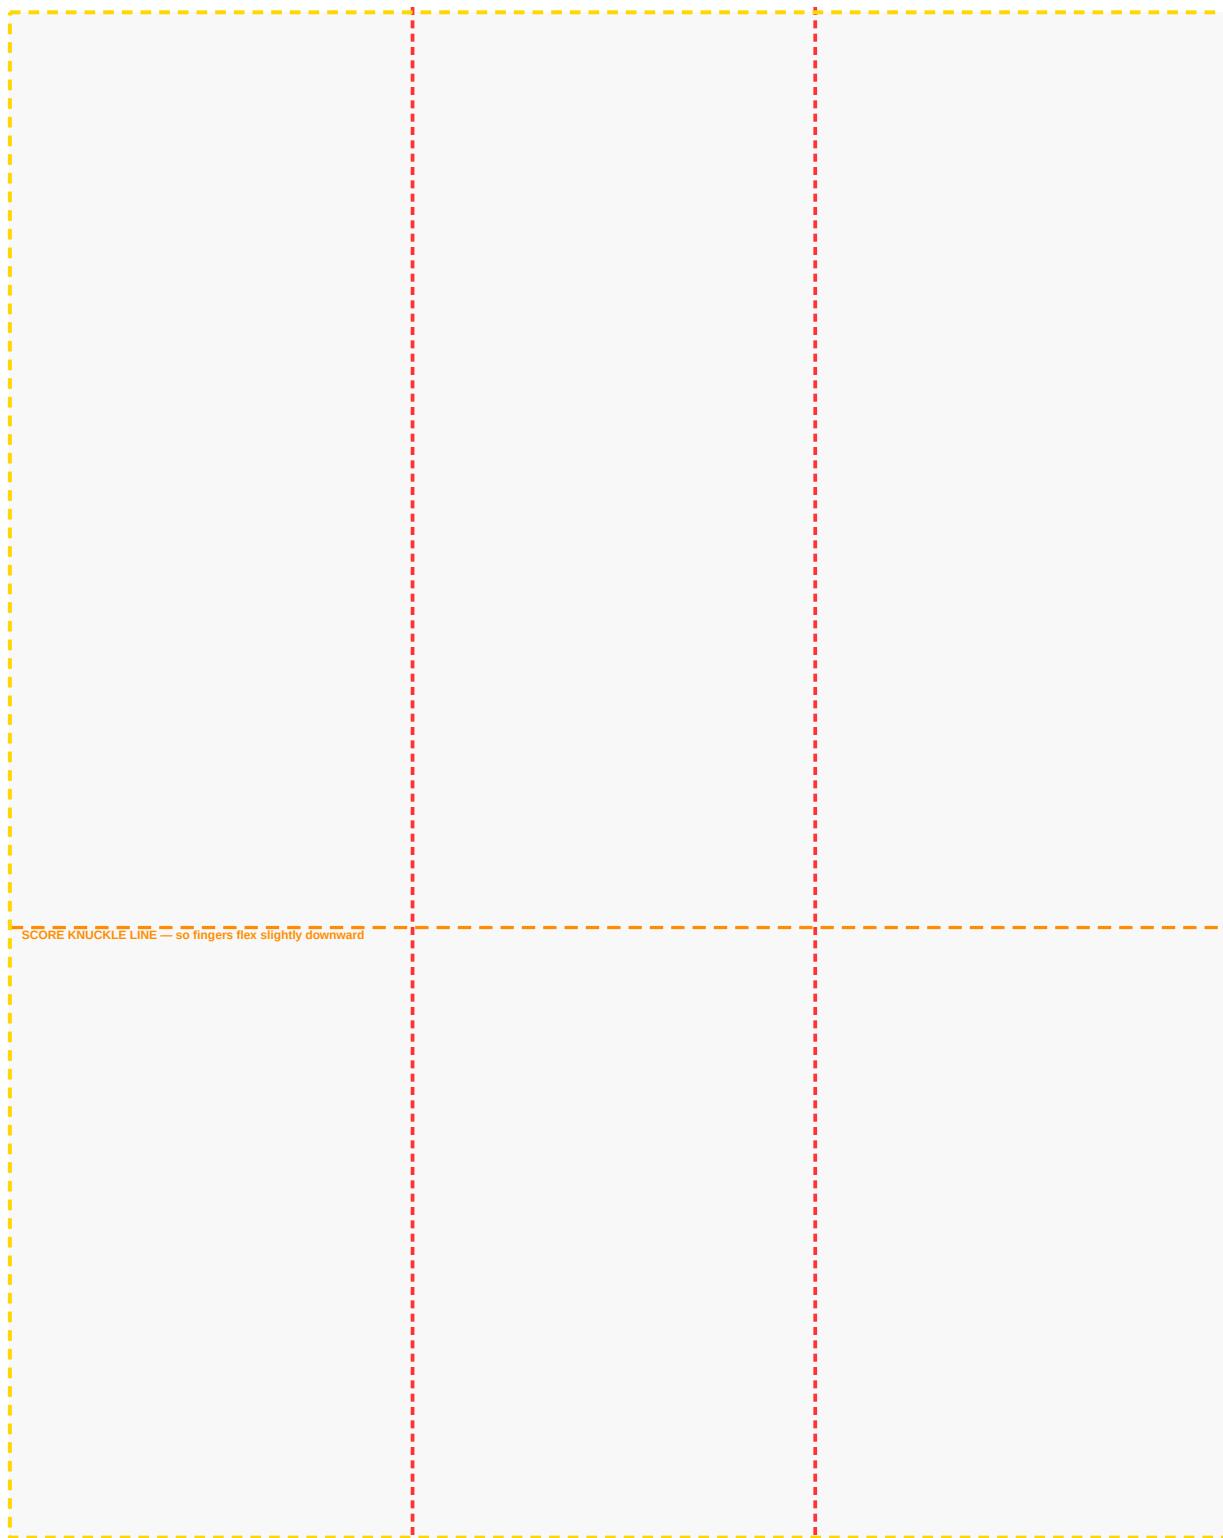

CLAW HAND PANEL

8" × 10" (20 × 25 cm) | Cut ×2

CUT
x2

CLAW HAND PANEL

x2

SCORE KNUCKLE LINE — so fingers flex slightly downward

8" × 10" (20 × 25 cm)
Cut 3 wide robot fingers

MARK LEGEND FOR THIS PIECE:

CUT — scissors or box cutter on this line

FOLD — score lightly, then fold at this line

NOTE: Cut 3 wide robot fingers

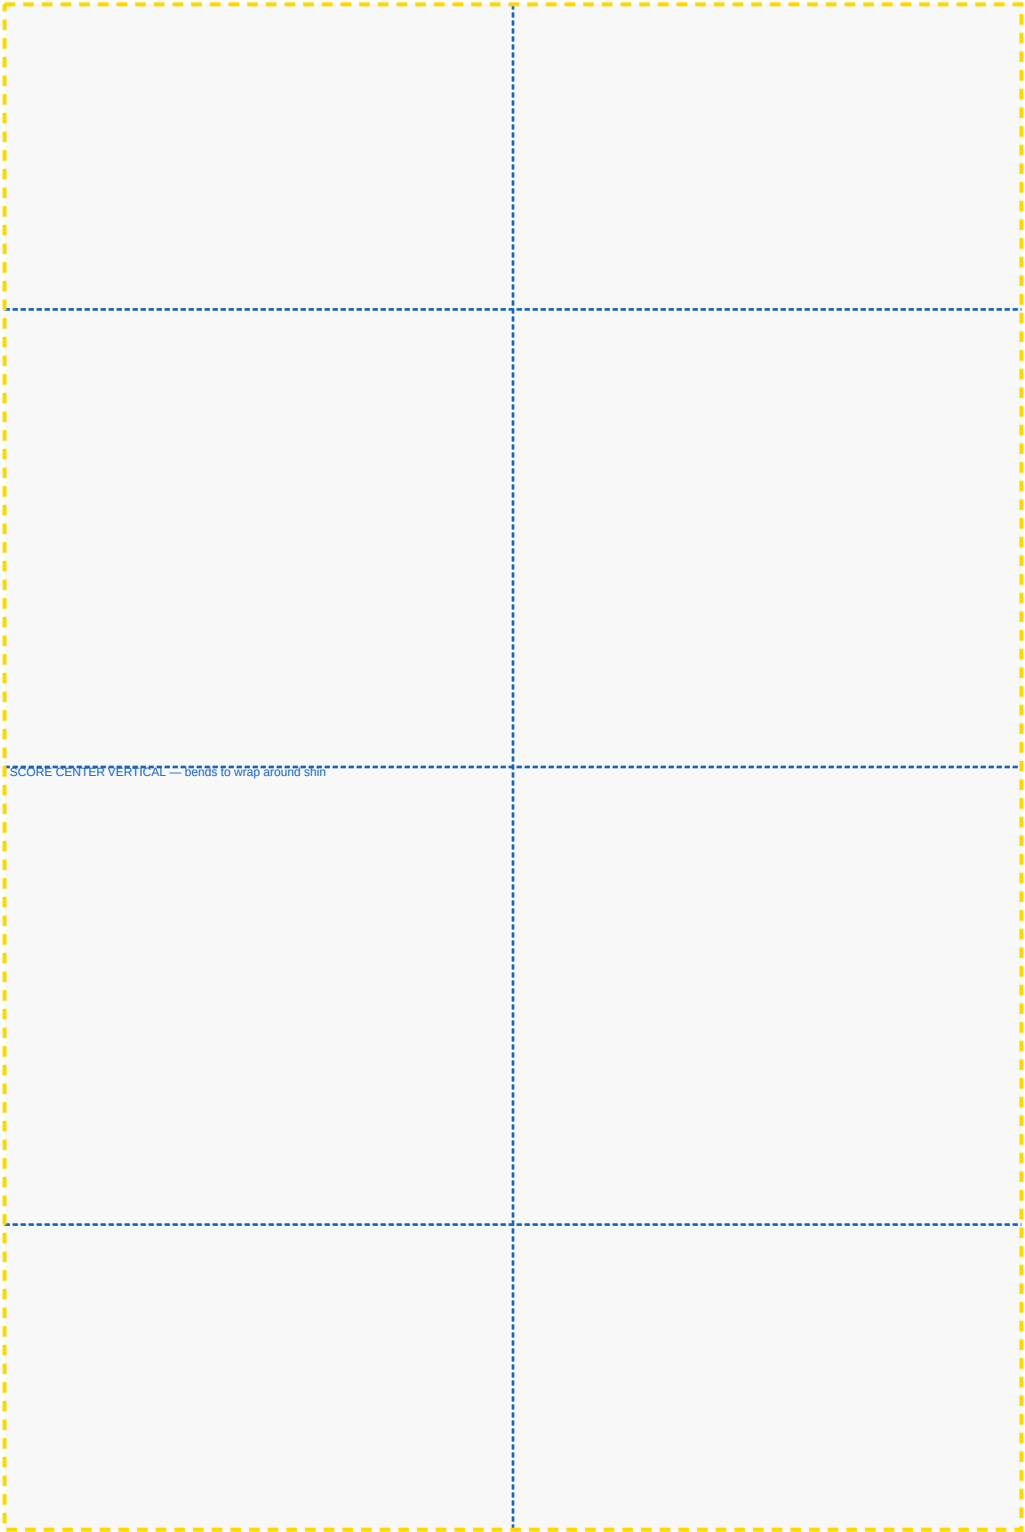

SHIN GUARD

8" x 12" (20 x 30 cm) | Cut x2

CUT
x2

SHIN GUARD

x2

8" x 12" (20 x 30 cm)
Score center to wrap shin

MARK LEGEND FOR THIS PIECE:

SCORE — press hard with ruler but do NOT cut through

NOTE: Score center to wrap shin

ANTENNA TUBE STRIP

8" × 2" (20 × 5 cm) | Cut ×1

CUT
x1

ANTENNA TUBE STRIP

ROLL

ROLL TIGHTLY into thin tube — tape solid. Mount vertical on head top.

8" × 2" (20 × 5 cm)
Roll into thin tube, mount on head top

MARK LEGEND FOR THIS PIECE:

ROLL — roll the cardboard tightly in this direction

NOTE:

Roll into thin tube, mount on head top

CARDBOARD PIECES — 7 TOTAL (3–4 Medium Boxes (at least 18" × 24" (46 × 61 cm) each))

×1 Robot Head (small box)
12" × 12" *Box fits over head — cut visor + mouth*

×1 Chest Front Panel
12" × 16" *Control panel face — buttons, dials*

×1 Chest Back Panel
12" × 16" *Matches front — add strap holes*

×2 Arm Tube Strip
10" × 10" *Wrap around upper arm*

×2 Claw Hand Panel
8" × 10" *Cut 3 wide robot fingers*

×2 Shin Guard
8" × 12" *Score center to wrap shin*

×1 Antenna Tube Strip
8" × 2" *Roll into thin tube, mount on head top*

TOOLS & SUPPLIES

- + 3–4 medium cardboard boxes
- + Small box for robot head (shoebox size)
- + Scissors
- + Packing tape
- + SILVER METALLIC PAINT or many silver markers (most important)
- + Blue or red markers for circuit detail
- + Clear cellophane for visor (optional — looks great)

FUN FACT!

The word "robot" was first used in a 1920 play. The robots eventually rebelled. Yours probably won't. Probably.

CHALLENGE!

Robot activation! Once dressed: walk in a straight line, spin once, pick up an object using only claw hands, state your mission.

1

STEP 1: BUILD THE ROBOT HEAD

! ADULT ASSIST NEEDED

Take a small box that fits over the child's head with breathing room. Using the cut marks on the template: cut the visor opening at eye level (2" (5 cm) tall × 8" (20 cm) wide). Cut the mouth grill slot below it. Roll the Antenna Strip into a thin tube ((roll) roll mark on template) and mount on top.

SAFETY: Visor MUST allow full forward vision and breathing. Test before completing.

2

STEP 2: BUILD THE CHEST UNIT

Punch shoulder strap holes at the top of both Chest Front and Chest Back panels (marks on template). Connect with tape loops over the shoulders. On the Chest Front, cut button shapes into the surface (marks on template) and add every kind of control: rectangles, circles, sliders. The more controls, the more robot.

3

STEP 3: BUILD THE ARM TUBES

Wrap each Arm Tube Strip around the upper arm ((roll) roll mark) and tape the seam. Score horizontal rib lines across the outside every inch (score marks on template) — these create the armored robot arm look.

4

STEP 4: BUILD THE CLAW HANDS

Cut the two vertical finger separation lines (cut marks at 1/3 and 2/3 across the template). Score the knuckle fold line (fold mark) so each finger curls slightly downward. These go over the child's actual hands.

5

STEP 5: BUILD THE SHIN GUARDS

Score the center vertical line on each Shin Guard (score mark on template) so it bends to wrap the shin. Score the 3 horizontal rib lines (score marks) for the robot leg texture. Punch holes at top and bottom for ribbon ties.

6

STEP 6: PAINT ALL SILVER

Paint every single piece metallic silver — every surface, every edge, every fold. This is the most important step. Add blue or red circuit pattern lines. Label the chest: HEE-BOT MK1. Add battery gauge on arm tubes.

SAFETY: Use water-based metallic paint in a ventilated space.

7

STEP 7: QUALITY CHECK

Child wears all 7 pieces. Head on, chest front/back connected, arm tubes on upper arms, claw hands over real hands, shin guards on legs, antenna upright. ALL SILVER. Control panel on chest. Compare to cover photo. That's the standard.

QUALITY CHECK!

Does your build match the cover photo? Compare side by side before you call it done.
