CARDBOARD FIRE TRUCK CAB

Life-Size Sit-In Fire Truck — Dashboard, Steering Wheel & Helmet

Build the fire truck. Wear the helmet. Save the living room.

AGES 4+	BOXES 2–3 Large Boxes	TIME 90 Minutes	DIFF Beginner *	PIECES 10 pcs
------------	--------------------------	--------------------	--------------------	------------------

CARDBOARD NEEDED:
2–3 Large Boxes (at least 24" × 36" (61 × 91 cm) each)

MISSION GOAL:
Build a sit-in fire truck cab with windshield, steering wheel, dashboard, light bar, hood — plus a wearable firefighter helmet. All exterior painted fire engine red.

HOW IT ALL GOES TOGETHER — CARDBOARD FIRE TRUCK CAB

The finished build, side view, with every part in the place the steps put it and the letter from its own cut-template page. Parts are drawn at their real size relative to each other, so if a letter is on this picture there is a page for it in this file. Pieces that roll into a tube are shown rolled, not laid flat.

EVERY PART IN THIS BUILD				
A	CAB SIDE PANEL 24" × 18" (61 × 46 cm)	CUT ×2	B	FRONT WINDSHIELD PANEL 20" × 18" (51 × 46 cm) CUT ×1
C	CAB FLOOR / SEAT BASE 20" × 16" (51 × 41 cm)	CUT ×1	D	HOOD EXTENSION 18" × 12" (46 × 30 cm) CUT ×1
E	STEERING WHEEL (CIRCLE) 10" × 10" (25 × 25 cm)	CUT ×2	F	STEERING COLUMN 4" × 8" (10 × 20 cm) CUT ×1
G	LIGHT BAR (ROOF STRIP) 20" × 6" (51 × 15 cm)	CUT ×1	H	HEADLIGHT CIRCLE 5" × 5" (13 × 13 cm) CUT ×2
I	REAR PANEL 20" × 18" (51 × 46 cm)	CUT ×1	J	HELMET WRAP 23" × 10" (58 × 25 cm) CUT ×1

BUILD SEQUENCE — WHAT IT LOOKS LIKE AFTER EACH STEP

Each picture is the build once that step is finished. The part you just added is the ORANGE one. Grey is what was already there. Work down the page and yours should look like each picture in turn.

1 BUILD THE CAB BOX

2 ADD THE WINDSHIELD

3 BUILD THE HOOD

4 BUILD THE STEERING WHEEL

6 MOUNT THE LIGHT BAR

7 CLOSE THE REAR PANEL

9 BUILD THE HELMET

CAB SIDE PANEL

24" x 18" (61 x 46 cm) | Cut x2

CUT

NOTE: Angles forward from base of windshield

STEERING WHEEL (CIRCLE)

x2

**HOW TO DRAW THIS SHAPE ON YOUR CARDBOARD:**

A circle 10" across. Trace a plate or a bowl, or pin a string 5" from the centre and swing a pencil right round. Cut two and stack them for rigidity.

Cut along the GOLD dashed outline. The faint grey box is the flat piece of cardboard it comes from; the grid squares are 2".

10" × 10" (25 × 25 cm)
Circle

MARK LEGEND FOR THIS PIECE:

GOLD OUTLINE — this is the shape you cut. It is NOT a rectangle.

CUT OUT — cut along the red dashes (an orange side is a fold)

NOTE: Stack both circles for thickness

STEERING COLUMN

4" x 8" (10 x 20 cm) | Cut x1

CUT
x1

MARK LEGEND FOR THIS PIECE:

FOLD — score lightly, then fold at this line

NOTE: Supports steering wheel from dash

LIGHT BAR (ROOF STRIP)

NOTE: Mount on top of cab — paint red and white stripes

HEADLIGHT CIRCLE

5" × 5" (13 × 13 cm) | Cut ×2

CUT
x2

HEADLIGHT CIRCLE

HOW TO DRAW THIS SHAPE ON YOUR CARDBOARD:
A circle 5" across. Trace the bottom of a cup or a roll of tape.

Cut along the GOLD dashed outline. The faint grey box is the flat piece of cardboard it comes from; the grid squares are 2".

5" × 5" (13 × 13 cm)
Circle

MARK LEGEND FOR THIS PIECE:

GOLD OUTLINE — this is the shape you cut. It is NOT a rectangle.

NOTE: Glue to front corners of hood

REAR PANEL

20" × 18" (51 × 46 cm) | Cut ×1

CUT
x1

MARK LEGEND FOR THIS PIECE:

FOLD — score lightly, then fold at this line

NOTE: Back wall of the cab

HELMET WRAP

23" x 10" (58 x 25 cm) | Cut x1

CUT

MARK LEGEND FOR THIS PIECE:

FOLD — score lightly, then fold at this line

NOTE: Add front brim from scrap — paint tan

WHAT YOU NEED — CARDBOARD FIRE TRUCK CAB

CARDBOARD PIECES — 10 TOTAL (2–3 Large Boxes (at least 24" × 36" (61 × 91 cm) each))

×2 Cab Side Panel
24" × 18"
Left + right walls of the cab

×1 Front Windshield Panel
20" × 18"
Cut large window at eye level

×1 Cab Floor / Seat Base
20" × 16"
Child sits on this — double layer for strength

×1 Hood Extension
18" × 12"
Angles forward from base of windshield

×2 Steering Wheel (circle)
10" × 10"
Stack both circles for thickness

×1 Steering Column
4" × 8"
Supports steering wheel from dash

×1 Light Bar (roof strip)
20" × 6"
Mount on top of cab — paint red and white stripes

×2 Headlight Circle
5" × 5"
Glue to front corners of hood

×1 Rear Panel
20" × 18"
Back wall of the cab

×1 Helmet Wrap
23" × 10"
Add front brim from scrap — paint tan

TOOLS & SUPPLIES

+ 2–3 large cardboard boxes

+ Box cutter — ADULT USE ONLY

+ Heavy scissors for kids

+ Packing tape (2+ rolls)

+ RED PAINT (most important — entire exterior is fire engine red)

+ Black + yellow markers for dashboard

+ Tan/brown paint for helmet

FUN FACT!

Real fire trucks pump 500 gallons of water per minute. Yours pumps 0 — but the bravery is the same.

CHALLENGE!

Fire drill! Set a 60-second timer. Can the whole family get to the fire truck and buckle in before the alarm goes off?

1

STEP 1: BUILD THE CAB BOX

Lay the Cab Floor flat (fold marks show where walls attach). Stand both Side Panels upright on left and right of the floor. Tape all inside seams with 3+ layers. This is the shell your child sits inside.

PIECES USED IN THIS STEP

2

STEP 2: ADD THE WINDSHIELD

! ADULT ASSIST NEEDED

Tape the Front Windshield Panel upright at the front. Cut out the windshield opening shown on the template, keeping the solid frame on all 4 sides. This is what the driver looks through.

SAFETY: Adult cuts the opening. Smooth edges — no sharp points.

PIECES USED IN THIS STEP

3

STEP 3: BUILD THE HOOD

Attach the Hood Extension at the base of the windshield using the fold mark. Score the midline (score mark on template) so the hood angles slightly downward. Attach a Headlight Circle to each front corner.

PIECES USED IN THIS STEP

4

STEP 4: BUILD THE STEERING WHEEL

Cut both Steering Wheel circles (trace a plate). In each one, cut out the two half-moon holes shown on the template so you are left with a rim and a bar across the middle to grip, like the cover photo. Stack them and tape together for double thickness. Tape the Steering Column to the back of the wheel, then mount the whole assembly inside the cab at chest height when seated.

SAFETY: Steering wheel must not block the child's exit from the cab.

PIECES USED IN THIS STEP

5

STEP 5: DRAW THE DASHBOARD

On the inside of the windshield panel below the window, draw a full dashboard — dials, gauges, a radio, a siren switch, a speedometer. The more detail, the better the build.

PIECES USED IN THIS STEP

6

STEP 6: MOUNT THE LIGHT BAR

Tape the Light Bar across the top of the windshield panel (fold mark on template). Paint bold diagonal red and white stripes across it, like the cover photo. This is the emergency light bar — the most important outside detail.

PIECES USED IN THIS STEP

7

STEP 7: CLOSE THE REAR PANEL

Tape the Rear Panel upright at the back of the cab floor. The child should now sit inside an enclosed cab with an open top.

PIECES USED IN THIS STEP

8

STEP 8: PAINT FIRE ENGINE RED

Paint the ENTIRE exterior fire engine red — every outside surface. This is the single most critical step. Add HEE FIRE DEPT or a badge number on the door. Add a flame logo on the side panel.

SAFETY: Water-based paint only in a ventilated space.

PIECES USED IN THIS STEP

9

STEP 9: BUILD THE HELMET

Score the center of the Helmet Wrap so it curves. Wrap it around the child's head, overlap the ends about 1 inch, trim the extra and tape the side seam. Cut a front brim from scrap cardboard (attachment mark on template). Paint tan or brown. This is the helmet in the cover photo.

SAFETY: Confirm child can see clearly and breathe with helmet on.

PIECES USED IN THIS STEP

10

STEP 10: QUALITY CHECK

Child sits at the steering wheel. Full red paint outside. Light bar on top. Firefighter helmet on. Compare to cover photo. That's the standard.

PIECES USED IN THIS STEP

QUALITY CHECK!

Does your build match the cover photo? Compare side by side before you call it done.
