CARDBOARD NEEDED:

4 Boxes (2 at least 24" × 36" (61 × 91 cm) + 2 used whole)

FINISHED SIZE:

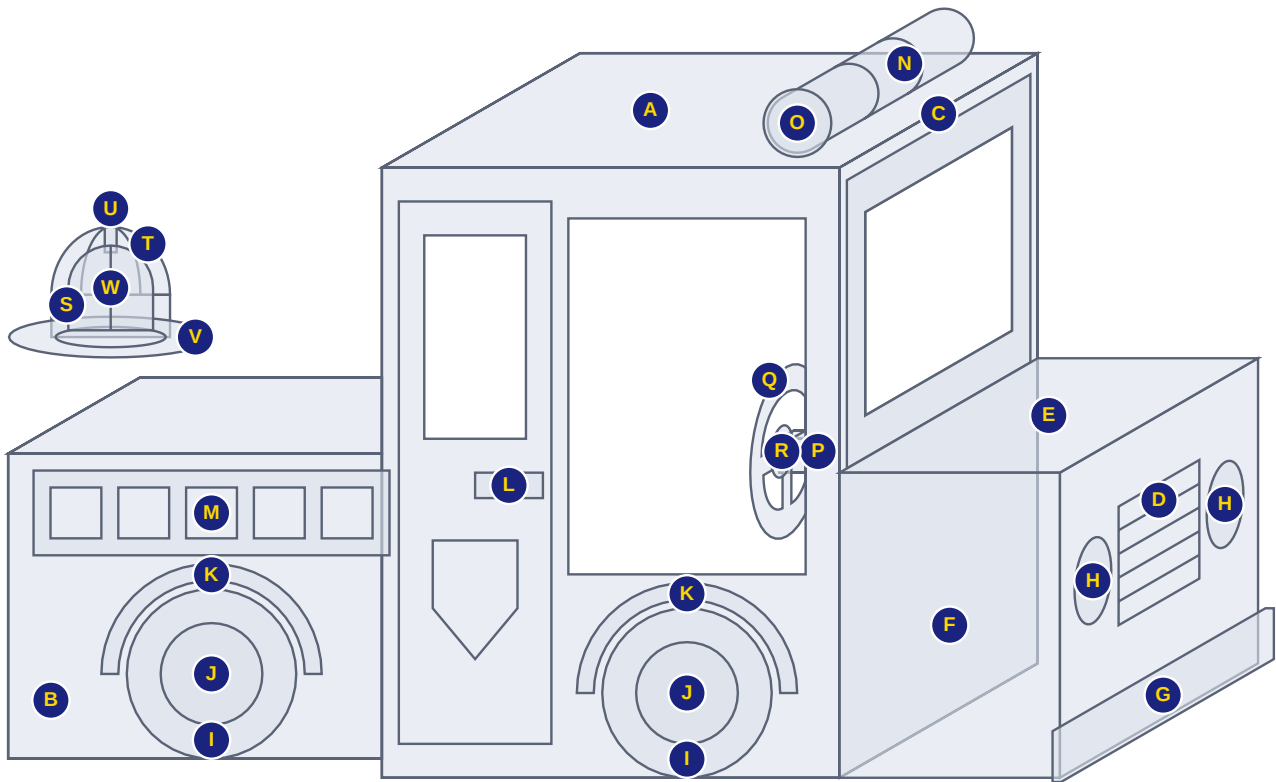

64" long × 28" wide × 40" tall with the light bar (163 × 71 × 102 cm); helmet fits heads 19.5–22.5"

MISSION GOAL:

Build the truck in the photo: a roofed cab with door windows, handles and badges; a hood with grille, headlights and bumper; 4 wheels in arches; a ladder body; a striped light bar; a 3-spoke wheel; and a domed helmet.

HOW IT ALL GOES TOGETHER — CARDBOARD FIRE TRUCK CAB

The finished build, from the front left, like the cover photo (helmet drawn beside it, from the front), with every part in the place the steps put it and the letter from its own cut-template page. Parts are drawn at their real size relative to each other, so if a letter is on this picture there is a page for it in this file. Pieces that roll into a tube are shown rolled, not laid flat.

¡DATO CURIOSO!

La bomba de un camión de bomberos de verdad mueve al menos 750 galones de agua por minuto. El tuyo bombea 0, pero la valentía es la misma.

¡DESAFÍO!

¡Simulacro de incendio! Pon un cronómetro de 60 segundos. ¿Puede toda la familia llegar al camión de bomberos y abrocharse antes de que suene la alarma?

1 PASO 1: MARCA LAS PIEZAS

Deja enteras las cajas A y B: son la cabina y la parte de atrás del camión. Aplana las dos cajas grandes y marca todas las demás piezas, de la C a la W, a partir de su página de plantilla, usando la cuadrícula de 2" (5 cm) y las medidas impresas en cada página. Dibuja cada círculo con un lápiz atado a una cuerda sujeta en el centro.

2 PASO 2: RECORTA LAS PIEZAS

! AYUDA DE UN ADULTO

Cierra con cinta las solapas de abajo de la caja de la cabina, por dentro y por fuera: ese es el piso. Cierra también las de arriba: ese es el techo. Ponla de pie, de 36" (91 cm) de alto. Ahora corta sus aberturas usando la plantilla A. Lado IZQUIERDO: la abertura del conductor, de 14" (36 cm) de ancho x 21" (53 cm) de alto, a 3" (8 cm) bajo el techo y a 2" (5 cm) del borde delantero, y la ventana de la puerta, de 6" x 12" (15 x 30 cm), a 2.5" (6 cm) del borde trasero y 4" (10 cm) bajo el techo. Haz lo mismo en el lado derecho, en espejo, para que ambas aberturas queden delante. FRENTE: un hueco para las piernas de 16" (41 cm) de ancho y 12" (30 cm) de alto, desde el borde de abajo, a 1" (3 cm) del lado izquierdo: las piernas se estiran bajo el capó. PASO 14: ARMA LA BANDA DEL CASCO

Haz cortes en el borde de abajo de la banda del casco hasta su línea de doblez cada 1" (3 cm), formando pestañas. Rodea la cabeza del niño justo por encima de las cejas, solapa los extremos 1" (3 cm), marca el punto, recorta ambos extremos y pega la unión por detrás.
