CARDBOARD FIRE TRUCK CAB

Life-Size Sit-In Fire Truck — Roofed Cab, Hood, 4 Wheels, Light Bar & Firefighter Helmet

Build the fire truck. Wear the helmet. Save the living room.

AGES 3–10	BOXES 4 Boxes	TIME 4–5 Hours	DIFF Intermediate **	PIECES 23 pcs
--------------	------------------	-------------------	-------------------------	------------------

CARDBOARD NEEDED:
4 Boxes (2 at least 24" × 36" (61 × 91 cm) + 2 used whole)

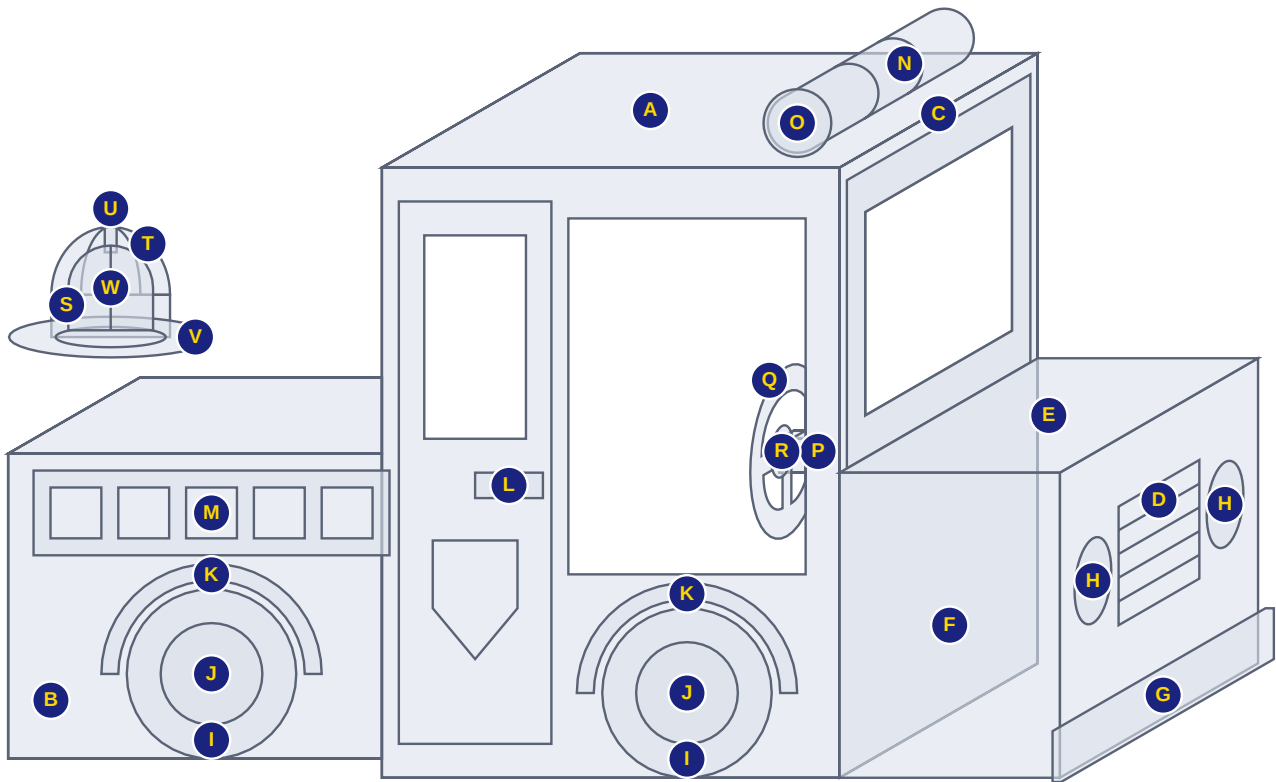

FINISHED SIZE:
64" long × 28" wide × 40" tall with the light bar (163 × 71 × 102 cm); helmet fits heads 19.5–22.5"

MISSION GOAL:

Build the truck in the photo: a roofed cab with door windows, handles and badges; a hood with grille, headlights and bumper; 4 wheels in arches; a ladder body; a striped light bar; a 3-spoke wheel; and a domed helmet.

HOW IT ALL GOES TOGETHER — CARDBOARD FIRE TRUCK CAB

The finished build, from the front left, like the cover photo (helmet drawn beside it, from the front), with every part in the place the steps put it and the letter from its own cut-template page. Parts are drawn at their real size relative to each other, so if a letter is on this picture there is a page for it in this file. Pieces that roll into a tube are shown rolled, not laid flat.

CURIOSIDADE!

A bomba de um caminhão de bombeiros de verdade movimenta pelo menos 750 galões de água por minuto. O seu bombeia 0 — mas a coragem é a mesma.

DESAFIO!

Simulado de incêndio! Marque 60 segundos no cronômetro. A família toda consegue chegar ao caminhão de bombeiros e apertar o cinto antes do alarme tocar?

1

PASSO 1: MARQUE AS PEÇAS

Deixe as caixas A e B inteiras — elas são a cabine e a parte de trás do caminhão. Desmonte as duas caixas grandes e marque todas as outras peças, de C a W, a partir da página de molde de cada uma, usando a grade de 2" (5 cm) e as medidas impressas em cada página. Desenhe cada círculo com um lápis amarrado num barbante preso no centro.

PASSO 2: RECORTE AS PEÇAS

! AJUDA DE UM ADULTO

Recorte cada peça pelo contorno dourado: C, D, E, 2 de F, G, 2 de H, 4 de I, 4 de J, 4 de K, 2 de L, 2 de M, N, 2 de O, P, 2 de Q, R, S, 6 de T, U, V e W. Recorte também os buracos marcados com tracejado vermelho em C, M, Q e V. Guarde as sobras para remendos.

SEGURANÇA: O adulto usa o estilete, sobre uma tábua. Corte os círculos aos poucos.

PASSO 3: PREPARE A CAIXA DA CABINE

! AJUDA DE UM ADULTO

Feche com fita as abas de baixo da caixa da cabine, por dentro e por fora — esse é o piso. Feche também as abas de cima — esse é o teto. Coloque-a de pé, com 36" (91 cm) de altura. Agora corte as aberturas usando o molde A. Lado ESQUERDO: a abertura do motorista, 14" (36 cm) de largura × 21" (53 cm) de altura, 3" (8 cm) abaixo do teto e a 2" (5 cm) da borda da frente, e a janela da porta, 6" × 12" (15 × 30 cm), a 2.5" (6 cm) da borda de trás e 4" (10 cm) abaixo do teto. Faça o mesmo no lado direito, espelhado, para que as duas aberturas fiquem na frente. FRENTE: uma abertura para as pernas de 16" (41 cm) de largura e 12" (30 cm) de altura, a partir da borda de baixo, a 1" (3 cm) do lado esquerdo — as pernas se esticam debaixo do capô. Passe fita em todas as bordas cortadas.

SEGURANÇA: O adulto corta. A borda fica a 12" do chão: ajude os pequenos a entrar.

PASSO 4: COLOQUE A MOLDURA DO PARA-BRISA

! AJUDA DE UM ADULTO

Segure a moldura do para-brisa na frente da caixa da cabine, 1" (3 cm) abaixo da borda do teto e a 1" (3 cm) de cada lado. Contorne o lado de dentro da abertura, tire a moldura e corte a caixa nessa linha — um buraco de 20" (51 cm) por 12" (30 cm). Cole a moldura de volta com cola e fita sobre o buraco.

SEGURANÇA: O adulto corta o buraco do para-brisa.

PASSO 5: COLOQUE AS MAÇANETAS

Com caneta preta desenhe cada porta: um retângulo de 9" (23 cm) de largura e 32" (81 cm) de altura, a 1" (3 cm) da borda de trás e 2" (5 cm) abaixo do teto, com a janela dentro dele. Dobre cada maçaneta da porta ao meio no comprimento e cole reta. Cole uma em cada porta, no quadrinho do molde A: 4" (10 cm) de largura, 18" (46 cm) abaixo do teto, a ½" da borda da frente da porta.

6

PASSO 6: MONTE O CAPÔ

Prenha com fita as duas laterais do capô nas bordas da frente do capô, por dentro e por fora, depois a tampa do capô por cima: uma caixa de 27" (69 cm) de largura, 18" (46 cm) de altura e 13" (33 cm) de profundidade, sem fundo e sem a parte de trás. Encoste-a na frente da caixa da cabine, centralizada sobre a abertura das pernas, e passe fita em todas as junções por dentro e por fora.

7

PASSO 7: COLOQUE O PARA-CHOQUE E OS FARÓIS

Dobre o para-choque ao meio no comprimento e cole reto. Cole-o na parte de baixo da frente do capô (quadro BUMPER), passando 1" (3 cm) de cada lado. Cole um farol em cada quadro LIGHT: a 2" (5 cm) de cada lado e 5" (13 cm) abaixo da borda de cima.

PEÇAS DESTE PASSO

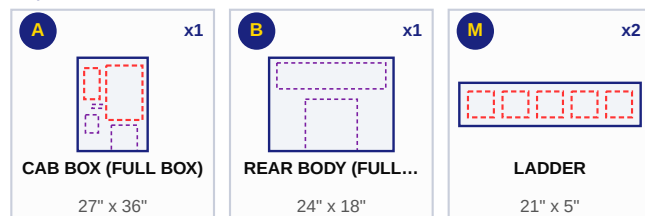

8

PASSO 8: COLOQUE A CARROCERIA TRASEIRA

Feche com fita as abas da carroceria traseira e deite-a de modo que fique com 24" (61 cm) de comprimento e 18" (46 cm) de altura. Encoste uma ponta na parte de trás da caixa da cabine, centralizada, e passe fita em todas as junções. Cole uma escada reta em cada lado, 1" (3 cm) abaixo da borda de cima e a 1.5" (4 cm) de cada ponta (quadro LADDER do molde B).

PEÇAS DESTE PASSO

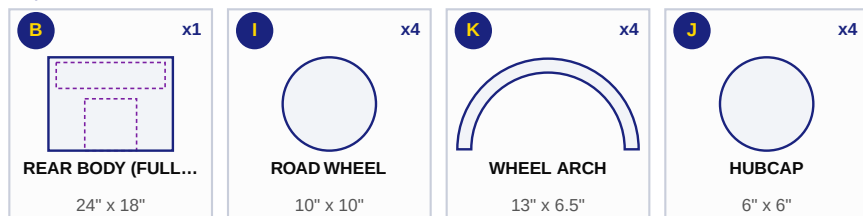

9

PASSO 9: COLOQUE AS RODAS

Cole uma calota no meio de cada roda. Em cada lado, cole uma roda na cabine, centralizada a 18" (46 cm) da parte de trás da cabine e encostando no chão (quadro ROAD WHEEL do molde A), e uma no meio da carroceria traseira, encostando no chão. Cole um para-lama sobre a metade de cima de cada roda, com as pontas retas na altura do meio da roda e ½" de folga em volta, como na foto.

10

PASSO 10: MONTE A BARRA DE LUZES

Enrole o tubo da barra de luzes até as duas bordas de 20" (51 cm) se sobreponham 1" (3 cm) e passe fita na emenda: um tubo de 20" (51 cm) de comprimento e uns 3.5" (9 cm) de largura. Prenda uma tampa da barra de luzes em cada ponta. Coloque-a atravessada no teto com o meio a 4" (10 cm) da borda da frente, centralizada de lado a lado, e prenda com fita dos dois lados.

11

PASSO 11: MONTE O VOLANTE

Cole as duas camadas do volante com os buracos alinhados e cole o centro do volante no meio, na frente. Vinque as 3 linhas da coluna de direção, dobre num tubo quadrado de 2" (5 cm) e passe fita na emenda. Corte 1" (3 cm) em cada canto de uma ponta e dobre as 4 abas para fora. Cole as abas por dentro da frente da cabine, a 9" (23 cm) da parede esquerda e 17" (43 cm) do chão — entre a abertura das pernas e o para-brisa. Cole a parte de trás do volante na outra ponta.

SEGURANÇA: O volante não pode bloquear a entrada nem a saída pela abertura.

12

PASSO 12: PINTE DE VERMELHO BOMBEIRO

Pinte de vermelho todas as superfícies de fora, como na foto: a cabine, o capô, a carroceria traseira, a moldura do para-brisa, as maçanetas, as escadas e os para-lamas. Deixe em papelão natural as rodas, as calotas, os faróis, o para-choque, o volante e o capacete. Deixe secar.

SEGURANÇA: Só tinta à base de água, em local ventilado.

PEÇAS DESTE PASSO

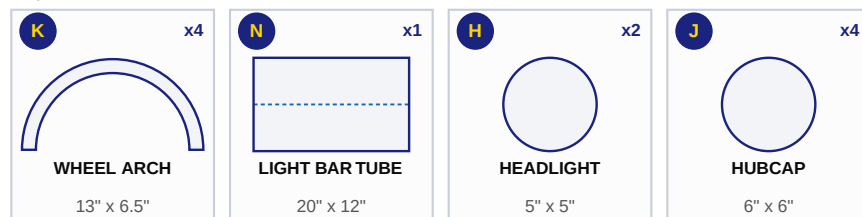

13

PASSO 13: PINTE OS DETALHES

Emblemas: no quadro BADGE de cada porta pinte um escudo de 5" (13 cm) de largura e 7" (18 cm) de altura (topo reto, lados retos por 4" (10 cm) e depois curvando até uma ponta embaixo), com contorno bege, miolo laranja e uma chama bege de umas 4" (10 cm) no meio. Grade: no quadro GRILLE do molde D pinte um retângulo um tom mais escuro que o vermelho e 4 linhas vermelho-escuro de lado a lado, a 1.4" (4 cm) uma da outra. Barra de luzes: pinte 7" (18 cm) de vermelho em cada ponta e deixe natural as 6" (15 cm) do meio. Pinte de vermelho-escuro a borda de cada para-lama e o contorno das portas. Desenhe um anel escuro logo dentro da borda de cada farol e calota.

14

PASSO 14: MONTE A FAIXA DO CAPACETE

Corte a borda de baixo da faixa do capacete até a linha de dobra a cada 1" (3 cm), formando abas. A faixa tem 23" (58 cm) de propósito — mais que a cabeça de qualquer criança (19.5–22.5" (50–57 cm) de contorno dos 3 aos 10 anos). Passe-a em volta da cabeça logo acima das sobrancelhas, sobreponha as pontas 1" (3 cm), marque, corte as duas pontas e prenda a emenda atrás com fita.

SEGURANÇA: Justa, não apertada: um dedo deve passar por baixo.

PEÇAS DESTE PASSO

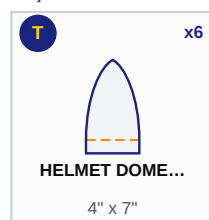

15

PASSO 15: MONTE A CÚPULA DO CAPACETE

Dobre para dentro a aba de cada um dos 6 painéis da cúpula do capacete. Prenda as abas por dentro da borda de cima da faixa, lado a lado em toda a volta, sobrepondo um pouco onde se encontram. Curve os painéis para dentro até as bordas curvas se encontrarem sobre a cabeça e passe fita em cada emenda até o topo. O topo do capacete agora é redondo, como na foto.

PEÇAS DESTE PASSO

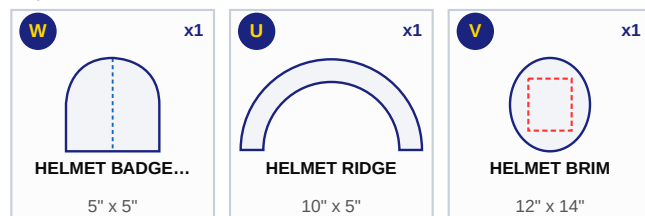

16

PASSO 16: COLOQUE A ABA, A CRISTA E A PLACA

Suba a aba do capacete pela faixa, vindo de baixo, até a linha das abas; dobre as abas retas sobre a aba e cole. Coloque a crista do capacete em pé ao longo do meio da cúpula, de frente para trás, com a curva de dentro sobre a cúpula, e prenda com fita dos dois lados. Dobre a placa do emblema do capacete na linha vincada e cole na frente, com a ponta reta sobre a aba, centralizada sob a crista. Deixe o capacete em papelão natural como na foto.

SEGURANÇA: Confira se a criança enxerga bem e vira a cabeça com ele.

17

PASSO 17: CONTROLE DE QUALIDADE

A criança entra, senta no piso com as pernas debaixo do capô, segura o volante de 3 raios e se debruça pela abertura do motorista. Teto no lugar, barra de luzes em cima, janela, maçaneta e emblema da porta dos dois lados, 4 rodas nos para-lamas, escadas na carroceria traseira, grade, faróis e para-choque na frente. Capacete: cúpula redonda, crista, placa do emblema e aba em toda a volta. Compare com a foto da capa. Esse é o padrão.
