CARDBOARD ROCKET SHIP

Life-Size Walk-In Rocket — Big Window, Swept Fins, Booster Flame & Stars

Build the 4½-foot rocket from the photo: your kid stands inside and waves through the big window.

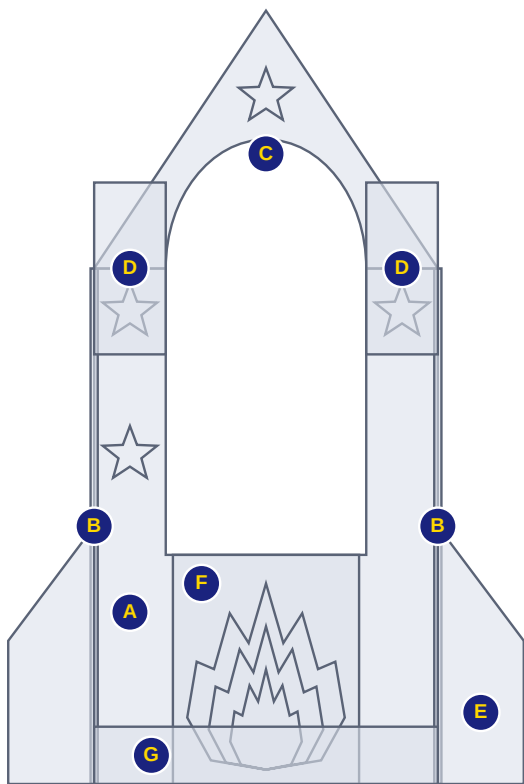

AGES 3–10	BOXES 3 Large Boxes	TIME 2–3 Hours	DIFF Beginner *	PIECES 7 pcs
--------------	------------------------	-------------------	--------------------	-----------------

CARDBOARD NEEDED:
3 Large Boxes (sides at least 24" × 36" (61 × 91 cm))
FINISHED SIZE:
54" tall × 36" wide at the fins × 24" deep (137 × 91 × 61 cm); window 16–45" off the floor

MISSION GOAL:
Build the rocket in the cover photo: a pointed nose, one tall round-topped window your child stands in, two swept fins, a booster box with a painted flame, and 4 yellow stars.

HOW IT ALL GOES TOGETHER — CARDBOARD ROCKET SHIP

The finished build, front view, with every part in the place the steps put it and the letter from its own cut-template page. Parts are drawn at their real size relative to each other, so if a letter is on this picture there is a page for it in this file. Pieces that roll into a tube are shown rolled, not laid flat.

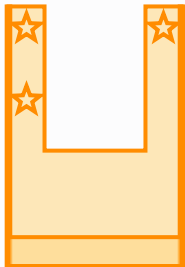

EVERY PART IN THIS BUILD			
A	BODY FRONT 24" × 36" (61 × 91 cm)	CUT ×1	
C	NOSE PANEL 24" × 18" (61 × 46 cm)	CUT ×1	
E	FIN 8" × 18" (20 × 46 cm)	CUT ×2	
G	BACK BRACE 28" × 4" (71 × 10 cm)	CUT ×1	
			B
			ROCKET SIDE 18" × 36" (46 × 91 cm)
			CUT ×2
			D
			NOSE JOINT PAD 5" × 12" (13 × 30 cm)
			CUT ×2
			F
			BOOSTER WRAP 29" × 16" (74 × 41 cm)
			CUT ×1

BUILD SEQUENCE — WHAT IT LOOKS LIKE AFTER EACH STEP

Each picture is the build once that step is finished. The part you just added is the ORANGE one. Grey is what was already there. Work down the page and yours should look like each picture in turn.

ADD THE BOOSTER BOX

BODY FRONT

x1

SIZE CHECK — THIS DRAWING IS NOT REAL SIZE. Printed on letter paper at 100% it measures about 4.6" × 6.9" (19% of real size). Cut your REAL piece at 24" × 36" (61 × 91 cm). Use a ruler, not the printout — each grid square = 2 real inches.

HOW TO DRAW THIS SHAPE ON YOUR CARDBOARD:

Mark 5" in from each top corner. From each mark draw a line straight down 20" and join the two line ends. Cut out that 14" x 20" slot: it is the bottom of the window.

Cut along the GOLD dashed outline. The faint grey box is the flat piece of cardboard it comes from; the grid squares are 2".

24" x 36" (61 x 91 cm)

Body front — a slot down from the top makes the bottom of the window

MARK LEGEND FOR THIS PIECE:

GOLD OUTLINE — this is the shape you cut. It is NOT a rectangle.

GLUE HERE — where another part goes

PAINT HERE — a painted detail, nothing is cut

NOTE: The front of the rocket; the slot is the bottom of the window

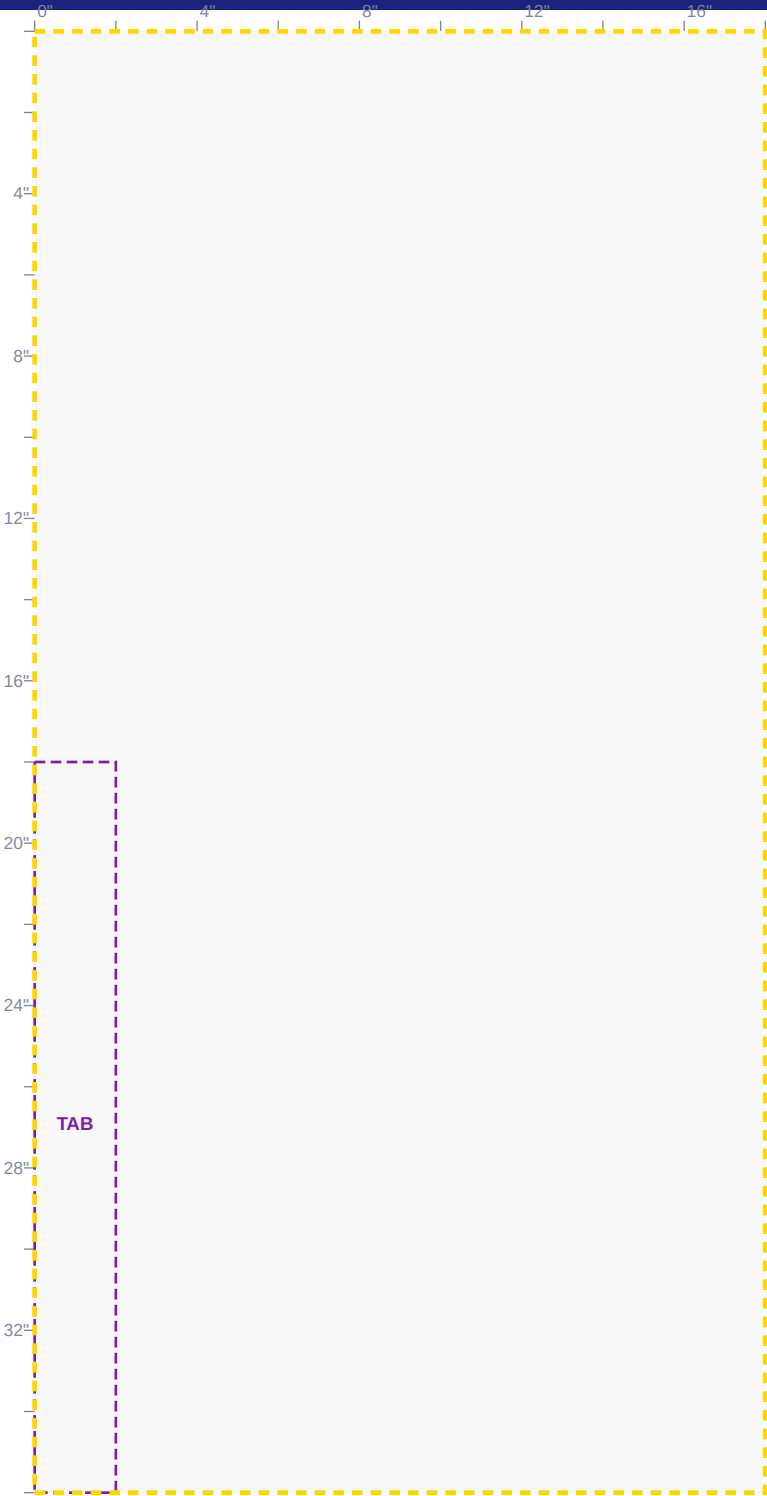

ROCKET SIDE

18" × 36" (46 × 91 cm) | Cut ×2

CUT
x2

ROCKET SIDE x2

SIZE CHECK — THIS DRAWING IS NOT REAL SIZE. Printed on letter paper at 100% it measures about 3.8" × 7.6" (21% of real size).
Cut your REAL piece at 18" × 36" (46 × 91 cm). Use a ruler, not the printout — each grid square = 2 real inches.

18" × 36" (46 × 91 cm)
Left and right walls. The back stays open: the astronaut walks in there

MARK LEGEND FOR THIS PIECE:

GLUE HERE — where another part goes

NOTE: Left and right walls. The back stays open: the astronaut walks in there

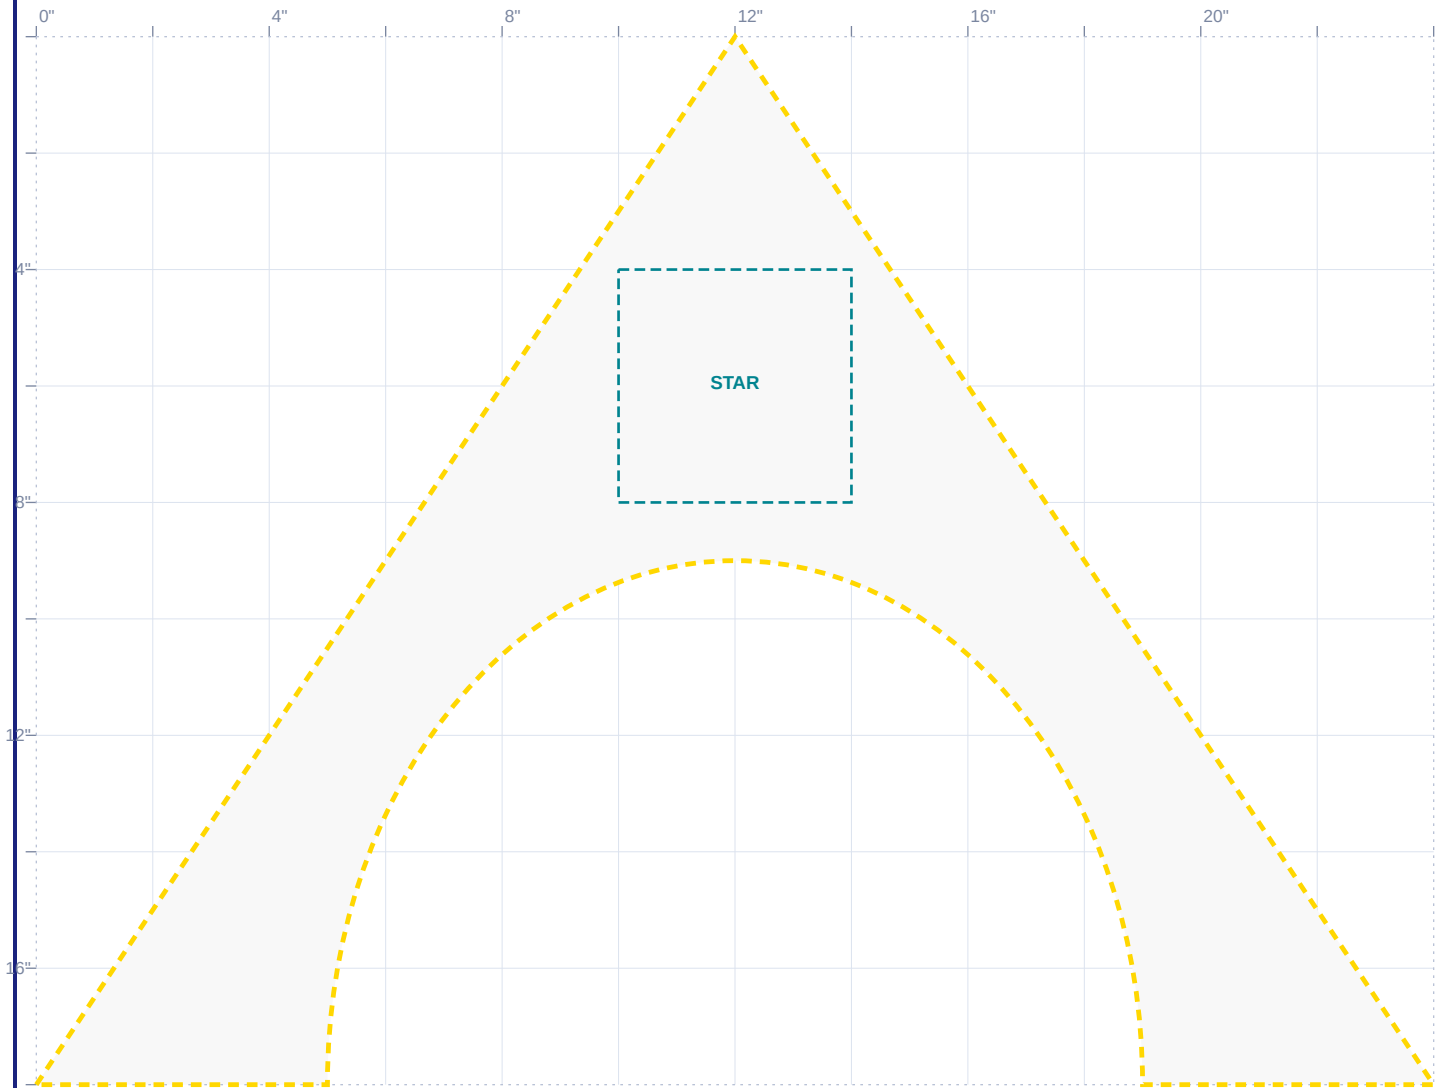

NOSE PANEL

24" × 18" (61 × 46 cm) | Cut ×1

CUT
x1

NOSE PANEL

x1

SIZE CHECK — THIS DRAWING IS NOT REAL SIZE. Printed on letter paper at 100% it measures about 7.3" × 5.5" (30% of real size).
Cut your **REAL** piece at 24" × 18" (61 × 46 cm). Use a ruler, not the printout — each grid square = 2 real inches.

HOW TO DRAW THIS SHAPE ON YOUR CARDBOARD:

Mark the centre of the top edge and draw straight lines down to both bottom corners. For the arch, mark the bottom edge 5" in from each corner and the centre line 9" up; draw a smooth round arch through the 3 marks (bend a thin strip of card as a guide) and cut it out. It is the top of the window.

Cut along the **GOLD** dashed outline. The faint grey box is the flat piece of cardboard it comes from; the grid squares are 2".

24" × 18" (61 × 46 cm)

Nose — a triangle with a round arch cut up out of its bottom edge

MARK LEGEND FOR THIS PIECE:

GOLD OUTLINE — this is the shape you cut. It is **NOT** a rectangle.

PAINT HERE — a painted detail, nothing is cut

NOTE: Stands on top of the Body Front; its arch is the top of the window

NOSE JOINT PAD

5" × 12" (13 × 30 cm) | Cut ×2

CUT

8"

SEAM LINE

SIZE CHECK — THIS DRAWING IS NOT REAL SIZE. Printed on letter paper at 100% it measures about 3.2" × 7.6" (63% of real size).
Cut your REAL piece at 5" × 12" (13 × 30 cm). Use a ruler, not the printout — each grid square = 2 real inches.

5" × 12" (13 × 30 cm)

Tape behind the seam where the nose meets the body, one each side of the window

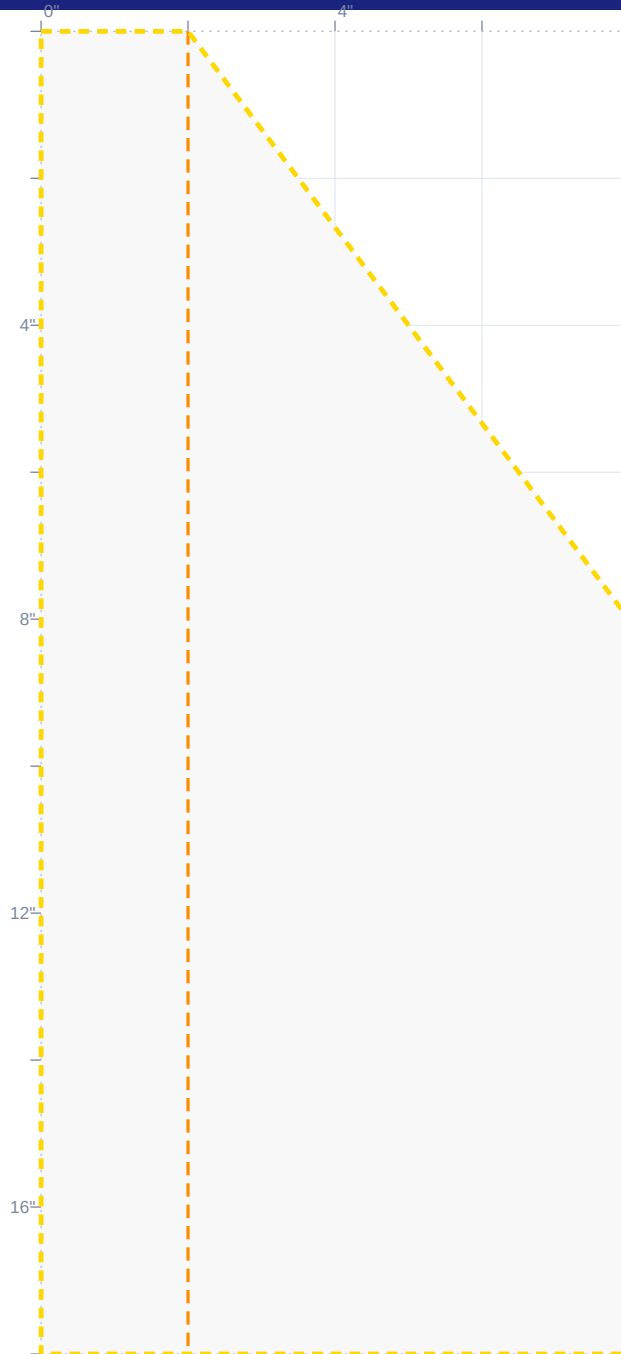

MARK LEGEND FOR THIS PIECE:

FOLD — score lightly, then fold at this line

NOTE: Tape behind the seam where the nose meets the body, one each side of the window

FIN

x2

SIZE CHECK — THIS DRAWING IS NOT REAL SIZE. Printed on letter paper at 100% it measures about 3.1" × 6.9" (38% of real size). Cut your REAL piece at 8" × 18" (20 × 46 cm). Use a ruler, not the printout — each grid square = 2 real inches.

HOW TO DRAW THIS SHAPE ON YOUR CARDBOARD:

Draw a line 2" in from the left edge: that strip is the tab. Mark the right edge 10" up from the bottom. Draw a straight line from the top of the tab line down to that mark. Cut 2; turn one over for the other side.

Cut along the GOLD dashed outline. The faint grey box is the flat piece of cardboard it comes from; the grid squares are 2".

8" × 18" (20 × 46 cm)

Swept fin — a tab on the left, the top edge sloping down to a short outer edge

MARK LEGEND FOR THIS PIECE:

GOLD OUTLINE — this is the shape you cut. It is NOT a rectangle.

FOLD — score lightly, then fold at this line

NOTE: Swept fins that stand on the floor at each side

BOOSTER WRAP

29" × 16" (74 × 41 cm) | Cut ×1

CUT

BACK BRACE

×1

0"4"8"12"16"20"24"

SIZE CHECK — THIS DRAWING IS NOT REAL SIZE. Printed on letter paper at 100% it measures about 7.3" × 1" (26% of real size).
Cut your REAL piece at 28" × 4" (71 × 10 cm). Use a ruler, not the printout — each grid square = 2 real inches.

28" × 4" (71 × 10 cm)
Ties the two Rocket Sides together across the open back, at floor level

MARK LEGEND FOR THIS PIECE:

FOLD — score lightly, then fold at this line

NOTE: Ties the two Rocket Sides together across the open back, at floor level

O QUE VOCÊ PRECISA — CARDBOARD ROCKET SHIP

PEÇAS DE PAPELÃO — 7 NO TOTAL (3 caixas grandes (lados de pelo menos 24" x 36" (61 x 91 cm)))

×1 **Frente do corpo**
24" x 36"
A frente do foguete; a fenda é a parte de baixo da janela

×2 **Lateral do foguete**
18" x 36"
Paredes esquerda e direita. A parte de trás fica aberta: o astronauta entra por aí

×1 **Painel do nariz**
24" x 18"
Fica em cima da frente do corpo; o seu arco é a parte de cima da janela

×2 **Reforço do nariz**
5" x 12"
Cola atrás da junção entre o nariz e o corpo, um de cada lado da janela

×2 **Aleta**
8" x 18"
Aletas inclinadas que assentam no chão de cada lado

×1 **Capa do propulsor**
29" x 16"
Dobra na caixa aberta de baixo à frente, que leva a chama

×1 **Reforço traseiro**
28" x 4"
Une as duas laterais do foguete na parte de trás aberta, rente ao chão

FERRAMENTAS E MATERIAIS

+ 3 caixas de cartão grandes (desmontadas)

+ X-ato: SÓ PARA ADULTOS

+ Fita adesiva larga (2 rolos ou mais)

+ Tinta ou marcadores: vermelho, laranja, amarelo

+ Régua comprida, lápis e um pedaço de barbante

+ Pincel

CURIOSIDADE!

O foguete Saturno V tinha 363 pés de altura. O seu tem 4½ pés. Por cada pé, o seu custou muito menos.

DESAFIO!

Desafio da missão: façam a contagem decrescente a partir de 10 em família. Na descolagem, TODOS saltam!

1

PASSO 1: DESMONTE E PLANEJE

Desmonte as caixas. Marque o molde A, B x2, C, D x2, E x2, F e G com as ondas do cartão para CIMA em cada peça, para as peças altas ficarem firmes.

2

PASSO 2: CORTE AS PEÇAS

! AJUDA DE UM ADULTO

Corte cada contorno pelas linhas douradas, incluindo a fenda de 14" x 20" (36 x 51 cm) em A e o arco redondo em C. Corte uma E e decalque-a para a segunda.

SEGURANÇA: O adulto usa o x-ato. Sem pontas afiadas na borda da janela.

3

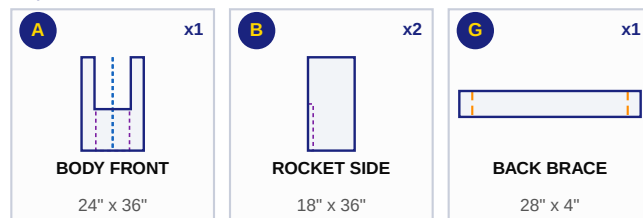

PASSO 3: LEVANTE O CORPO

! AJUDA DE UM ADULTO

Por de pé a frente do corpo com a fenda em cima. Cole uma lateral do foguete a cada borda, em ângulo reto, para o foguete ser uma estrutura de 3 lados com 24" (61 cm) de largura e 18" (46 cm) de fundo, aberta atrás. Cole cada costura por dentro e por fora. Dobre para a frente as pontas de 2" (5 cm) do reforço traseiro e cole-o atravessado na parte de trás aberta, rente ao chão, para as laterais não abrirem.

SEGURANÇA: Duas pessoas: uma segura as paredes, a outra cola.

PEÇAS DESTE PASSO

4

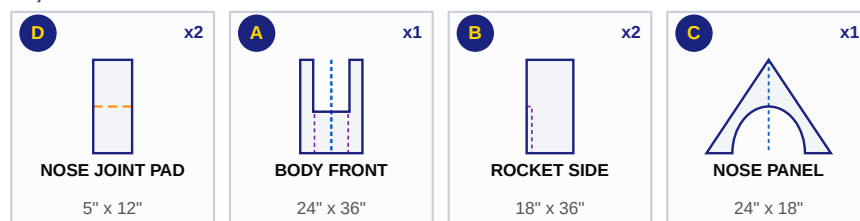

PASSO 4: COLOQUE O NARIZ

! AJUDA DE UM ADULTO

Por de pé o painel do nariz em cima da frente do corpo, com o arco mesmo sobre a fenda, para os dois formarem uma só janela alta. Cole um reforço do nariz atrás de cada poste lateral, com a linha SEAM LINE sobre a junção: metade no corpo, metade no nariz. Cole também a junção pela frente e cole os cantos de baixo do nariz ao topo das laterais do foguete.

SEGURANÇA: Uma pessoa segura o nariz direito enquanto a outra cola.

PEÇAS DESTE PASSO

5

PASSO 5: VERIFIQUE A JANELA

O astronauta entra por trás. A janela vai de 16" (41 cm) até 45" (114 cm) do chão. Crianças com até cerca de 46" (117 cm) de altura ficam de pé com a cabeça e os ombros na janela, como na foto; uma criança maior ajoelha-se lá dentro.

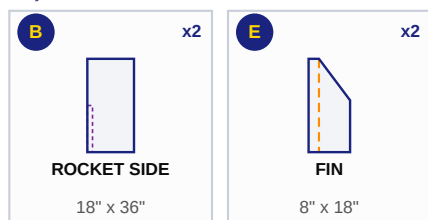

SEGURANÇA: A parte de trás fica aberta para a criança poder sempre sair a andar.

6

PASSO 6: COLOQUE AS ALETAS

Dobre a aba de 2" (5 cm) de cada aleta. Cole a aba por fora de uma lateral do foguete, mesmo na borda da frente, com a aleta virada para fora e a borda de baixo no chão, como na foto. A borda alta fica contra o foguete e a borda inclinada em cima.

PEÇAS DESTE PASSO

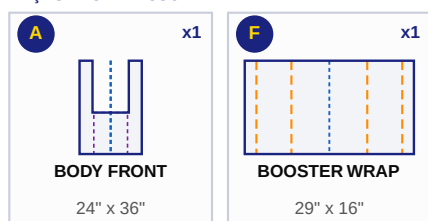

7

PASSO 7: COLOQUE A CAIXA DO PROPULSOR

Dobre a capa do propulsor pelas suas 4 linhas: aba de 2" (5 cm), lado de 6" (15 cm), frente de 13" (33 cm), lado de 6" (15 cm), aba de 2" (5 cm). Ponha-a à frente da frente do corpo, por baixo da janela, aberta em cima, e cole as duas abas à frente do corpo na marca BOOSTER BOX.

PEÇAS DESTE PASSO

8

PASSO 8: PINTE A CHAMA

Na frente da caixa do propulsor pinte uma chama vermelha com 11" (28 cm) de largura e 13" (33 cm) de altura, com a base arredondada 1" (3 cm) acima do chão e 5 pontas, a mais alta no meio. Dentro pinte uma chama laranja com 8" (20 cm) de largura e 10" (25 cm) de altura, e depois uma amarela com 5" (13 cm) de largura e 7" (18 cm) de altura, todas com a mesma base.

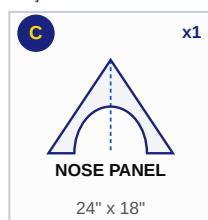

SEGURANÇA: Só tinta à base de água.

9

PASSO 9: PINTE AS ESTRELAS

Pinte 4 estrelas amarelas de cinco pontas com cerca de 4" (10 cm): uma no nariz acima da janela, uma no topo de cada poste ao lado da janela e outra 10" (25 cm) mais abaixo no poste esquerdo. As marcas STAR dos moldes mostram cada lugar. Deixe o resto do foguete em cartão castanho, como na foto.

PEÇAS DESTE PASSO

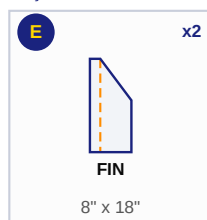

10

PASSO 10: CONTROLO DE QUALIDADE

O astronauta entra por trás e acena pela janela. O foguete fica de pé sem tombar, as aletas tocam o chão, a chama destaca-se na caixa do propulsor e as 4 estrelas brilham. Compare com a foto da capa. Esse é o padrão.

PEÇAS DESTE PASSO

CONTROLE DE QUALIDADE!

A sua montagem está parecida com a foto? Compare lado a lado antes de finalizar.
