CARDBOARD ROCKET SHIP

Life-Size Walk-In Rocket — Big Window, Swept Fins, Booster Flame & Stars

Build the 4½-foot rocket from the photo: your kid stands inside and waves through the big window.

AGES 3–10	BOXES 3 Large Boxes	TIME 2–3 Hours	DIFF Beginner *	PIECES 7 pcs
--------------	------------------------	-------------------	--------------------	-----------------

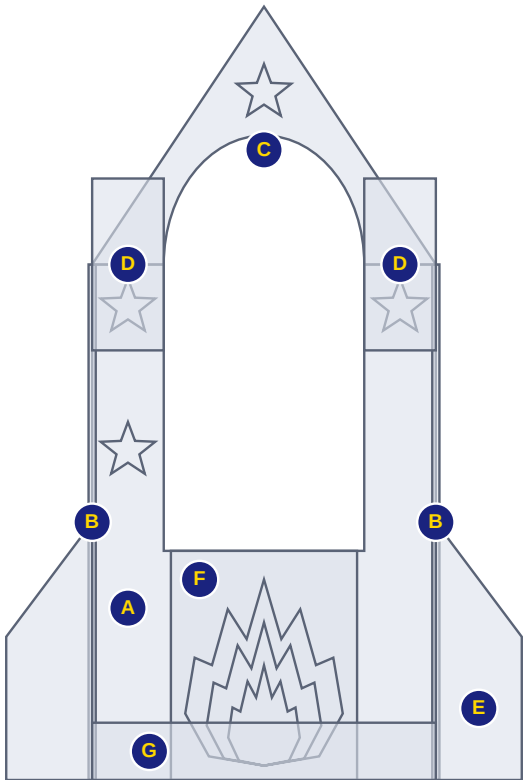

CARDBOARD NEEDED:
3 Large Boxes (sides at least 24" × 36" (61 × 91 cm))

FINISHED SIZE:
54" tall × 36" wide at the fins × 24" deep (137 × 91 × 61 cm); window 16–45" off the floor

MISSION GOAL:
Build the rocket in the cover photo: a pointed nose, one tall round-topped window your child stands in, two swept fins, a booster box with a painted flame, and 4 yellow stars.

HOW IT ALL GOES TOGETHER — CARDBOARD ROCKET SHIP

The finished build, front view, with every part in the place the steps put it and the letter from its own cut-template page. Parts are drawn at their real size relative to each other, so if a letter is on this picture there is a page for it in this file. Pieces that roll into a tube are shown rolled, not laid flat.

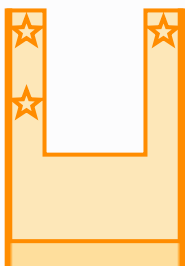

EVERY PART IN THIS BUILD				
A	BODY FRONT 24" × 36" (61 × 91 cm)	CUT ×1	B	ROCKET SIDE 18" × 36" (46 × 91 cm) CUT ×2
C	NOSE PANEL 24" × 18" (61 × 46 cm)	CUT ×1	D	NOSE JOINT PAD 5" × 12" (13 × 30 cm) CUT ×2
E	FIN 8" × 18" (20 × 46 cm)	CUT ×2	F	BOOSTER WRAP 29" × 16" (74 × 41 cm) CUT ×1
G	BACK BRACE 28" × 4" (71 × 10 cm)	CUT ×1		

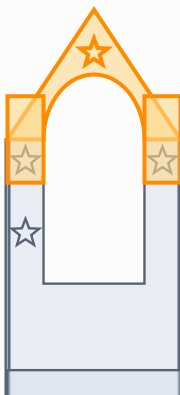

BUILD SEQUENCE — WHAT IT LOOKS LIKE AFTER EACH STEP

Each picture is the build once that step is finished. The part you just added is the ORANGE one. Grey is what was already there. Work down the page and yours should look like each picture in turn.

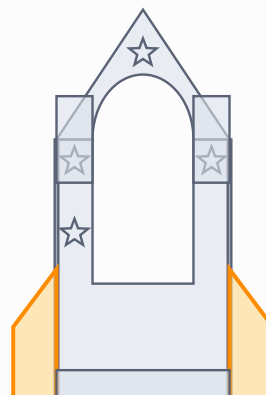

3 STAND UP THE BODY

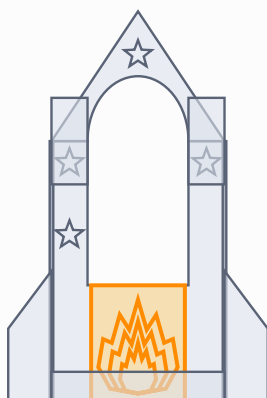

4 ADD THE NOSE

6 ATTACH THE FINS

7 ADD THE BOOSTER BOX

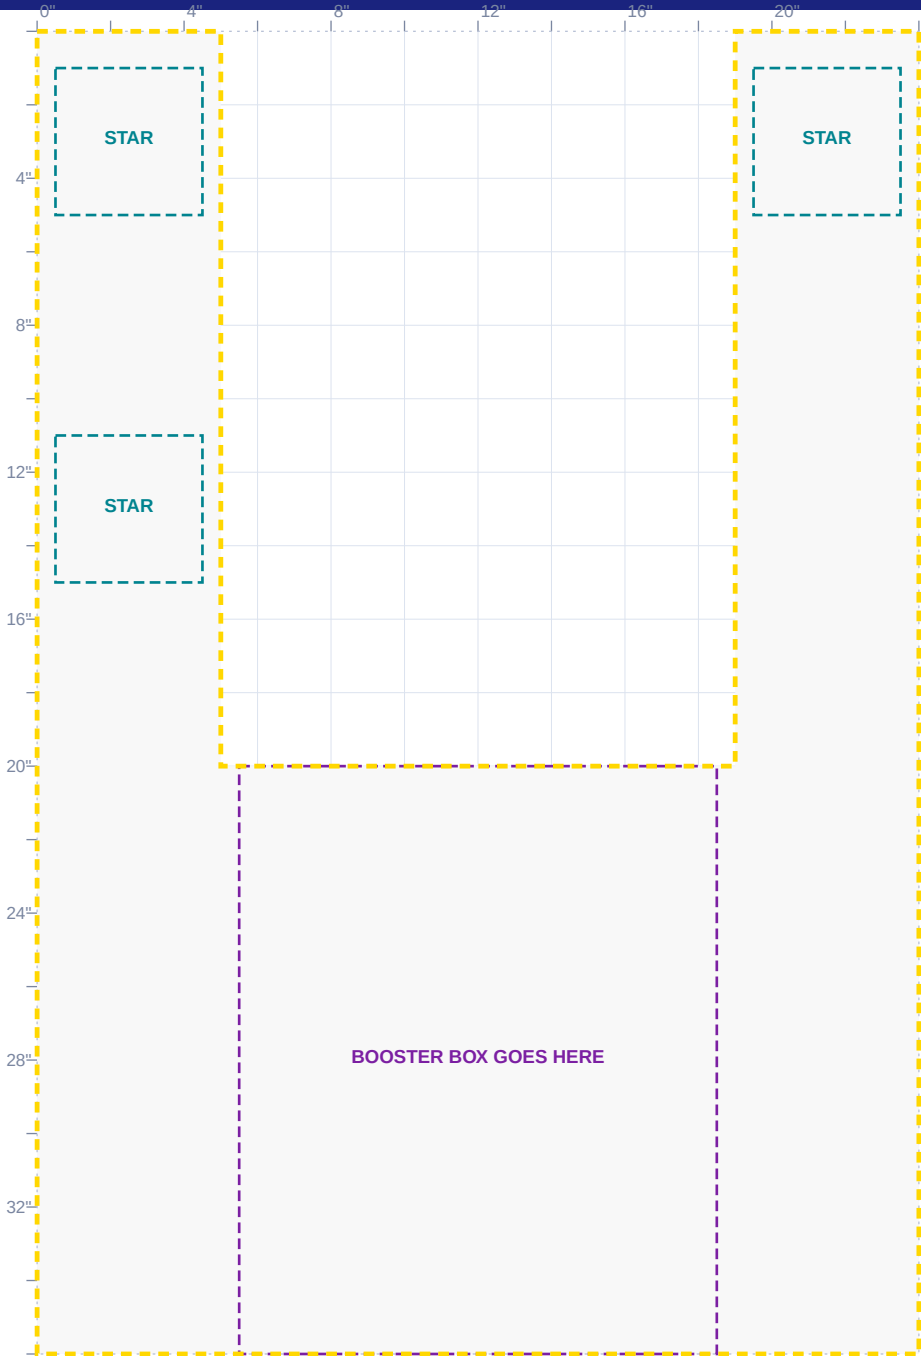

BODY FRONT

24" × 36" (61 × 91 cm) | Cut ×1

CUT
x1

BODY FRONT

x1

SIZE CHECK — THIS DRAWING IS NOT REAL SIZE. Printed on letter paper at 100% it measures about 4.6" × 6.9" (19% of real size). Cut your REAL piece at 24" × 36" (61 × 91 cm). Use a ruler, not the printout — each grid square = 2 real inches.

HOW TO DRAW THIS SHAPE ON YOUR CARDBOARD:
Mark 5" in from each top corner. From each mark draw a line straight down 20" and join the two line ends. Cut out that 14" × 20" slot: it is the bottom of the window.
Cut along the GOLD dashed outline. The faint grey box is the flat piece of cardboard it comes from; the grid squares are 2".

24" × 36" (61 × 91 cm)
Body front — a slot down from the top makes the bottom of the window

MARK LEGEND FOR THIS PIECE:

GOLD OUTLINE — this is the shape you cut. It is NOT a rectangle.	GLUE HERE — where another part goes	PAINT HERE — a painted detail, nothing is cut
--	-------------------------------------	---

NOTE: The front of the rocket; the slot is the bottom of the window

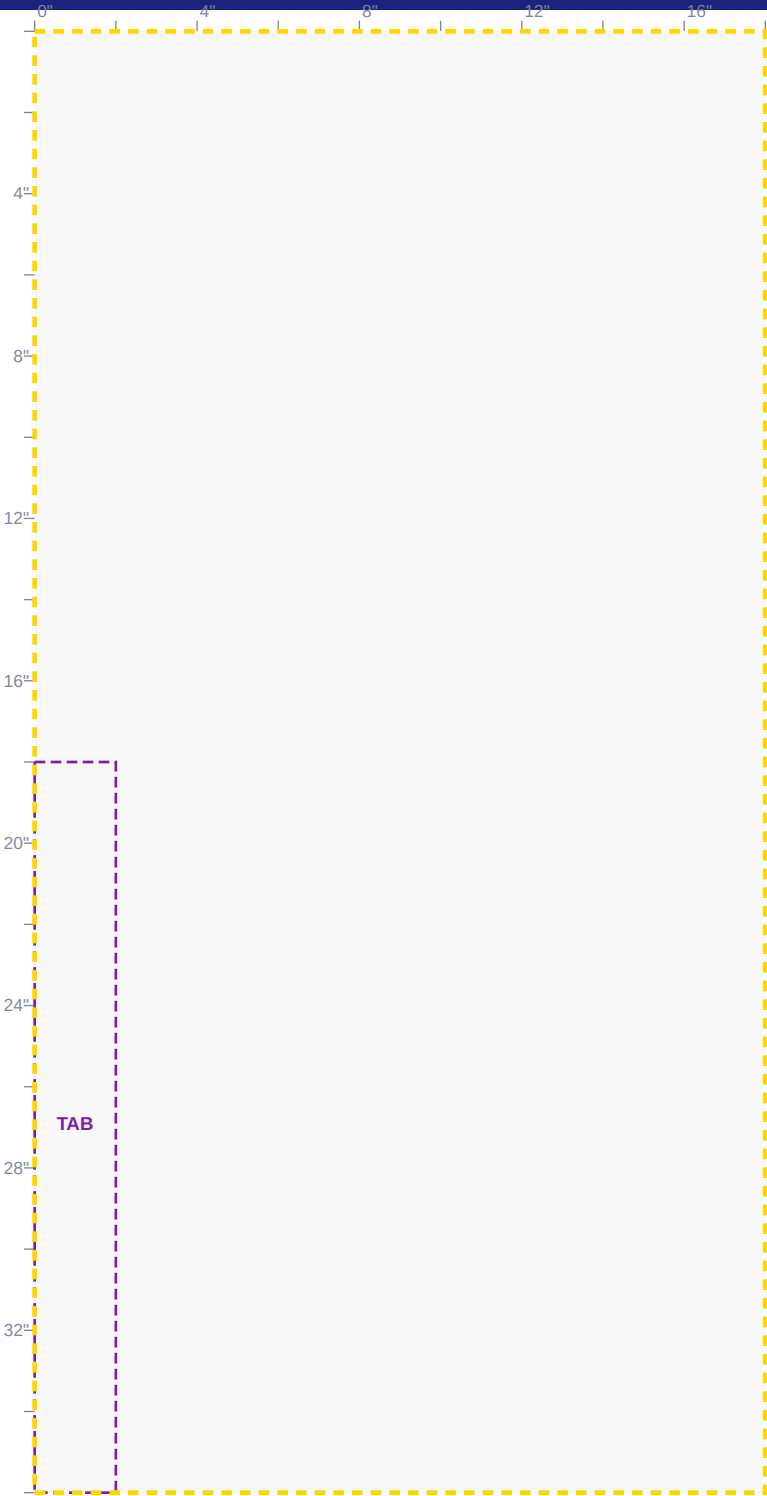

ROCKET SIDE

18" × 36" (46 × 91 cm) | Cut ×2

CUT
x2

ROCKET SIDE x2

SIZE CHECK — THIS DRAWING IS NOT REAL SIZE. Printed on letter paper at 100% it measures about 3.8" × 7.6" (21% of real size).
Cut your REAL piece at 18" × 36" (46 × 91 cm). Use a ruler, not the printout — each grid square = 2 real inches.

18" × 36" (46 × 91 cm)
Left and right walls. The back stays open: the astronaut walks in there

MARK LEGEND FOR THIS PIECE:

GLUE HERE — where another part goes

NOTE: Left and right walls. The back stays open: the astronaut walks in there

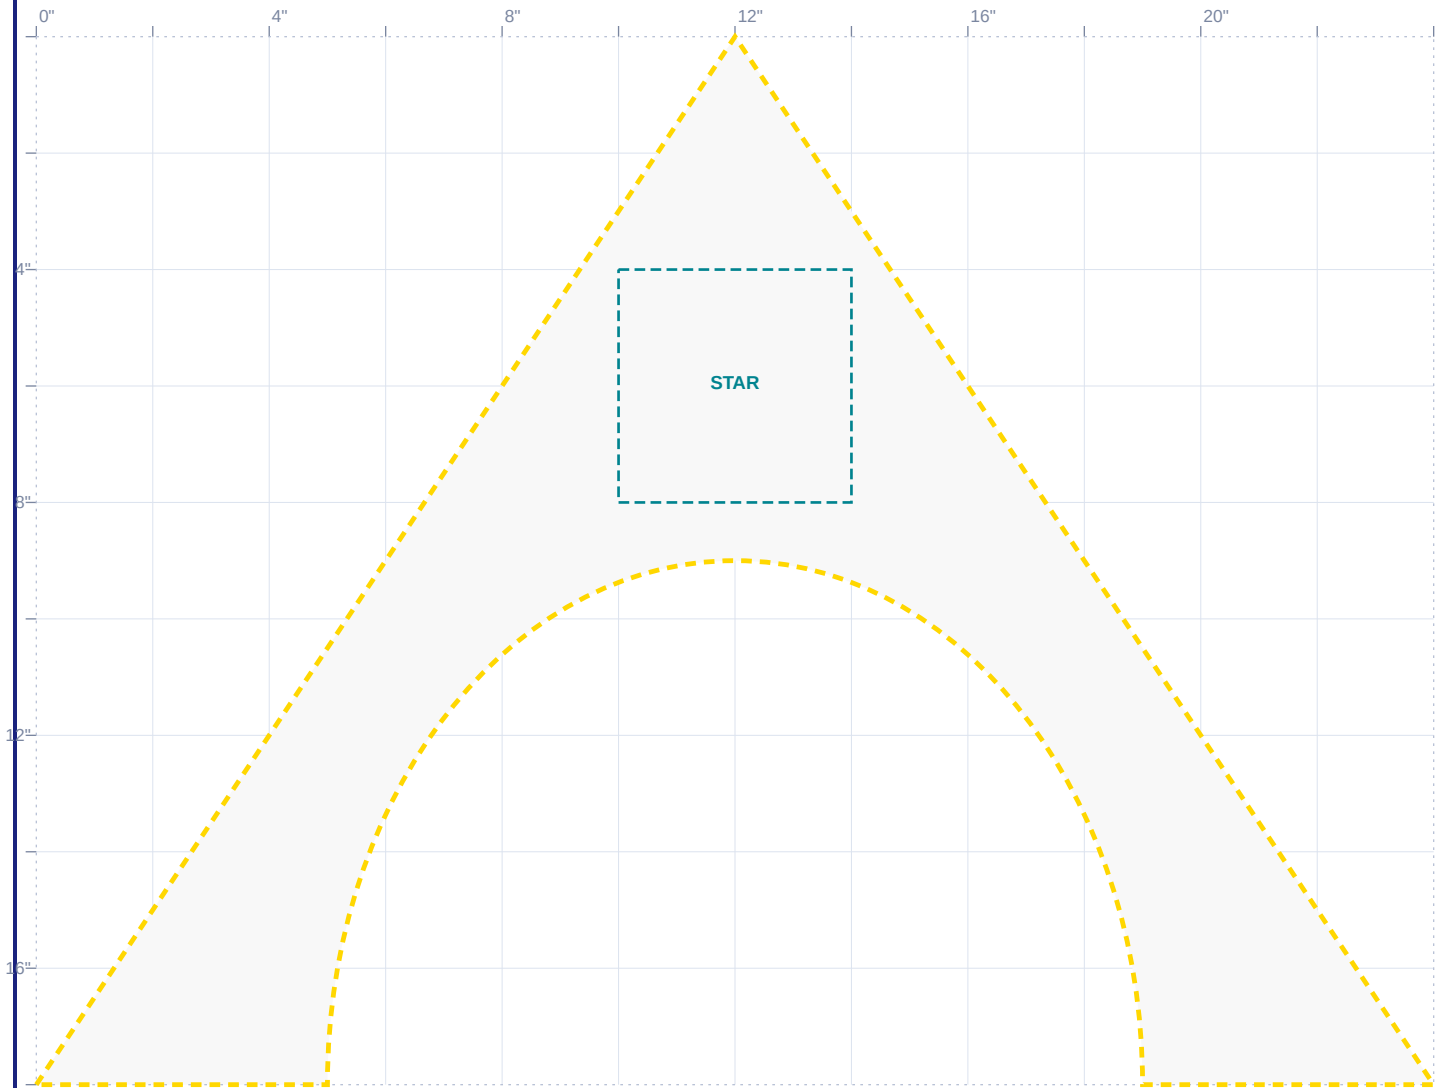

NOSE PANEL

24" × 18" (61 × 46 cm) | Cut ×1

CUT
x1

NOSE PANEL

x1

SIZE CHECK — THIS DRAWING IS NOT REAL SIZE. Printed on letter paper at 100% it measures about 7.3" × 5.5" (30% of real size).
Cut your **REAL** piece at 24" × 18" (61 × 46 cm). Use a ruler, not the printout — each grid square = 2 real inches.

HOW TO DRAW THIS SHAPE ON YOUR CARDBOARD:

Mark the centre of the top edge and draw straight lines down to both bottom corners. For the arch, mark the bottom edge 5" in from each corner and the centre line 9" up; draw a smooth round arch through the 3 marks (bend a thin strip of card as a guide) and cut it out. It is the top of the window.

Cut along the **GOLD** dashed outline. The faint grey box is the flat piece of cardboard it comes from; the grid squares are 2".

24" × 18" (61 × 46 cm)

Nose — a triangle with a round arch cut up out of its bottom edge

MARK LEGEND FOR THIS PIECE:

GOLD OUTLINE — this is the shape you cut. It is **NOT** a rectangle.

PAINT HERE — a painted detail, nothing is cut

NOTE: Stands on top of the Body Front; its arch is the top of the window

NOSE JOINT PAD

5" x 12" (13 x 30 cm) | Cut x2

CUT
x2

NOSE JOINT PAD

0"

4"

4"

8"

SEAM LINE

SIZE CHECK — THIS DRAWING IS NOT REAL SIZE. Printed on letter paper at 100% it measures about 3.2" x 7.6" (63% of real size).
Cut your REAL piece at 5" x 12" (13 x 30 cm). Use a ruler, not the printout — each grid square = 2 real inches.

5" x 12" (13 x 30 cm)

Tape behind the seam where the nose meets the body, one each side of the window

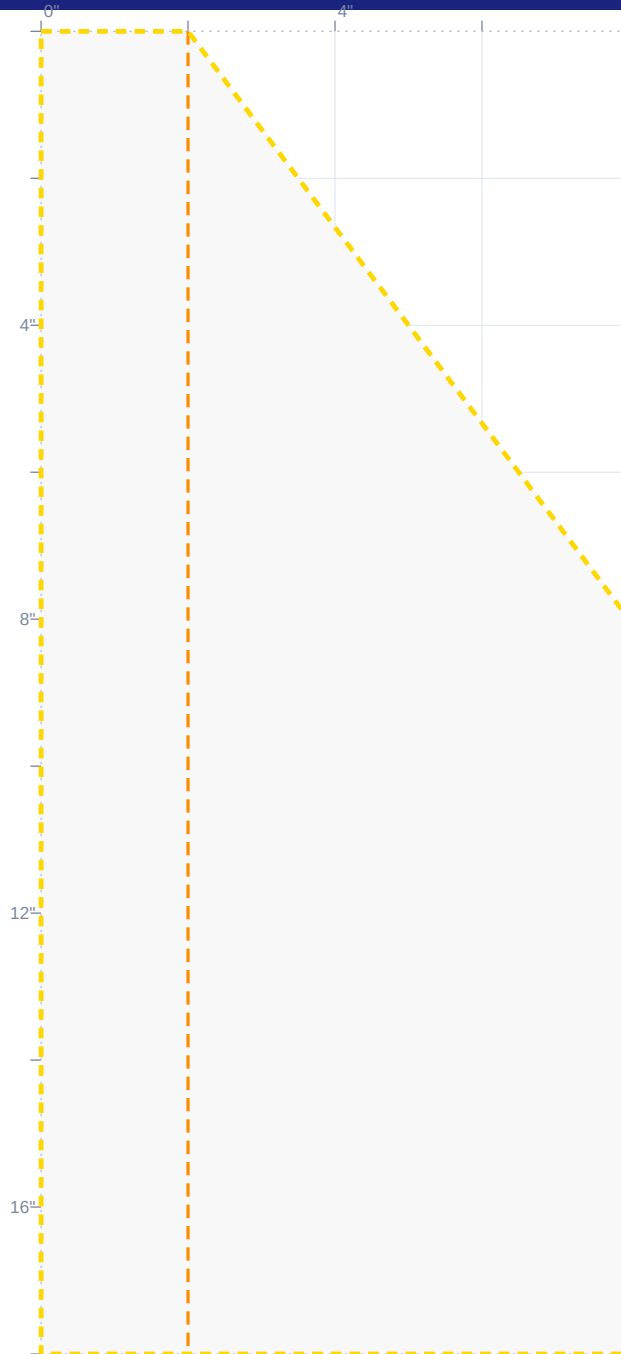

MARK LEGEND FOR THIS PIECE:

FOLD — score lightly, then fold at this line

NOTE: Tape behind the seam where the nose meets the body, one each side of the window

FIN

x2

SIZE CHECK — THIS DRAWING IS NOT REAL SIZE. Printed on letter paper at 100% it measures about 3.1" × 6.9" (38% of real size). Cut your REAL piece at 8" × 18" (20 × 46 cm). Use a ruler, not the printout — each grid square = 2 real inches.

HOW TO DRAW THIS SHAPE ON YOUR CARDBOARD:

Draw a line 2" in from the left edge: that strip is the tab. Mark the right edge 10" up from the bottom. Draw a straight line from the top of the tab line down to that mark. Cut 2; turn one over for the other side.

Cut along the GOLD dashed outline. The faint grey box is the flat piece of cardboard it comes from; the grid squares are 2".

8" × 18" (20 × 46 cm)

Swept fin — a tab on the left, the top edge sloping down to a short outer edge

MARK LEGEND FOR THIS PIECE:

GOLD OUTLINE — this is the shape you cut. It is NOT a rectangle.

FOLD — score lightly, then fold at this line

NOTE: Swept fins that stand on the floor at each side

BOOSTER WRAP

29" × 16" (74 × 41 cm) | Cut ×1

CUT
x1

BOOSTER WRAP

x1

SIZE CHECK — THIS DRAWING IS NOT REAL SIZE. Printed on letter paper at 100% it measures about 7.3" × 4" (25% of real size).
Cut your REAL piece at 29" × 16" (74 × 41 cm). Use a ruler, not the printout — each grid square = 2 real inches.

29" × 16" (74 × 41 cm)
Folds into the open box at the bottom front that carries the flame

MARK LEGEND FOR THIS PIECE:

FOLD — score lightly, then fold at this line	PAINT HERE — a painted detail, nothing is cut
--	---

NOTE: Folds into the open box at the bottom front that carries the flame

BACK BRACE

28" × 4" (71 × 10 cm) | Cut ×1

CUT
x1

BACK BRACE

×1

The diagram shows a rectangular template for the Back Brace. It is 28 inches wide and 4 inches high. A ruler scale is shown along the top edge, ranging from 0 to 24 inches in 4-inch increments. The template features a central rectangular area with dashed lines indicating where to fold. There are vertical fold lines at 4 inches from each side, and horizontal fold lines at the top and bottom edges. The central area is shaded light gray.

SIZE CHECK — THIS DRAWING IS NOT REAL SIZE. Printed on letter paper at 100% it measures about 7.3" × 1" (26% of real size).
Cut your REAL piece at 28" × 4" (71 × 10 cm). Use a ruler, not the printout — each grid square = 2 real inches.

28" × 4" (71 × 10 cm)
Ties the two Rocket Sides together across the open back, at floor level

MARK LEGEND FOR THIS PIECE:

FOLD — score lightly, then fold at this line

NOTE: Ties the two Rocket Sides together across the open back, at floor level

WHAT YOU NEED — CARDBOARD ROCKET SHIP

CARDBOARD PIECES — 7 TOTAL (3 Large Boxes (sides at least 24" × 36" (61 × 91 cm)))

×1 Body Front
24" × 36"
The front of the rocket; the slot is the bottom of the window

×2 Rocket Side
18" × 36"
Left and right walls. The back stays open: the astronaut walks in there

×1 Nose Panel
24" × 18"
Stands on top of the Body Front; its arch is the top of the window

×2 Nose Joint Pad
5" × 12"
Tape behind the seam where the nose meets the body, one each side of the window

×2 Fin
8" × 18"
Swept fins that stand on the floor at each side

×1 Booster Wrap
29" × 16"
Folds into the open box at the bottom front that carries the flame

×1 Back Brace
28" × 4"
Ties the two Rocket Sides together across the open back, at floor level

TOOLS & SUPPLIES

+ 3 large cardboard boxes (flattened)

+ Box cutter — ADULT USE ONLY

+ Packing tape (2+ rolls)

+ Paint or markers: red, orange, yellow

+ Yardstick, pencil and a piece of string

+ Paintbrush

FUN FACT!

The Saturn V rocket was 363 feet tall. Yours is 4½ feet. Per foot, yours cost way less to build.

CHALLENGE!

Mission challenge: count down from 10 as a family. On blastoff — EVERYONE jumps!

1 STEP 1: FLATTEN & PLAN

Flatten the boxes. Mark out template A, B x2, C, D x2, E x2, F and G with the cardboard ridges running UP each piece, so the tall parts stay stiff.

2 STEP 2: CUT OUT THE PARTS

! ADULT ASSIST NEEDED

Cut every outline on the gold lines, including the 14" x 20" (36 x 51 cm) slot in A and the round arch in C. Cut one E, then trace it for the second.

SAFETY: Adult uses the box cutter. No sharp inward points on the window edge.

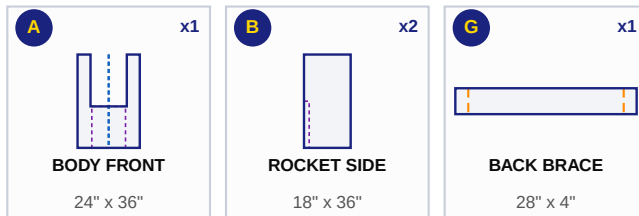

3 STEP 3: STAND UP THE BODY

! ADULT ASSIST NEEDED

Stand the Body Front up with its slot at the top. Tape a Rocket Side to each side edge, at right angles, so the rocket is a 3-sided shell 24" (61 cm) wide and 18" (46 cm) deep, open at the back. Tape every seam inside and out. Fold the 2" (5 cm) ends of the Back Brace forward and tape it across the open back at floor level so the sides cannot spread.

SAFETY: Two people: one holds the walls, one tapes.

PIECES USED IN THIS STEP

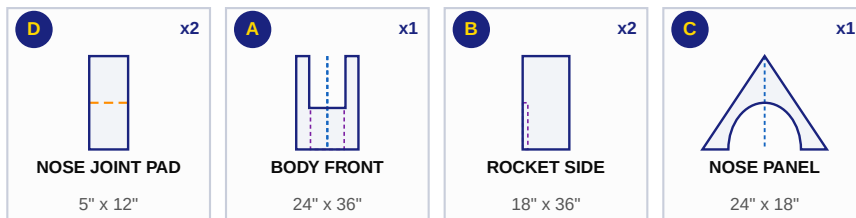

4 STEP 4: ADD THE NOSE

! ADULT ASSIST NEEDED

Stand the Nose Panel on top of the Body Front, its arch right over the slot, so the two make one tall window. Tape a Nose Joint Pad behind each side post, SEAM LINE on the seam: half on the body, half on the nose. Tape the front seam too, and tape the nose's bottom corners to the tops of the Rocket Sides.

SAFETY: One person holds the nose straight while the other tapes.

PIECES USED IN THIS STEP

5 STEP 5: CHECK THE WINDOW FIT

The astronaut walks in from the back. The window runs from 16" (41 cm) up to 45" (114 cm) off the floor. Children up to about 46" (117 cm) in height stand with head and shoulders in the window, like the photo; a bigger child kneels inside.

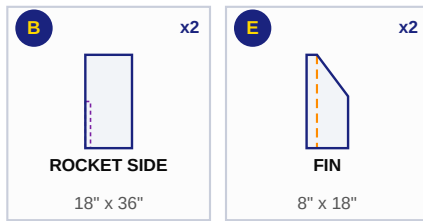

SAFETY: The back stays open so the child can always walk straight out.

6

STEP 6: ATTACH THE FINS

Fold the 2" (5 cm) tab on each Fin. Tape the tab to the outside of a Rocket Side, right at its front edge, with the fin sticking straight out sideways and its bottom on the floor, like the photo. The tall edge goes against the rocket, the sloped edge on top.

PIECES USED IN THIS STEP

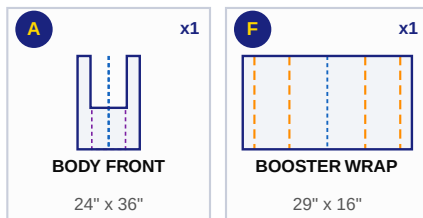

7

STEP 7: ADD THE BOOSTER BOX

Fold the Booster Wrap on its 4 lines: 2" (5 cm) tab, 6" (15 cm) side, 13" (33 cm) front, 6" (15 cm) side, 2" (5 cm) tab. Stand it in front of the Body Front, below the window, open at the top, and tape both tabs to the Body Front on the BOOSTER BOX mark.

PIECES USED IN THIS STEP

8

STEP 8: PAINT THE FLAME

On the front of the booster box paint a red flame 11" (28 cm) wide and 13" (33 cm) tall, its rounded bottom 1" (3 cm) above the floor, with 5 pointed tips, tallest in the middle. Inside it paint an orange flame 8" (20 cm) wide and 10" (25 cm) tall, then a yellow one 5" (13 cm) wide and 7" (18 cm) tall, all sharing the same bottom.

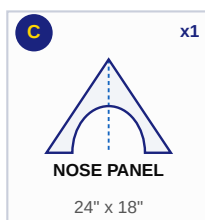

SAFETY: Water-based paint only.

9

STEP 9: PAINT THE STARS

Paint 4 yellow five-point stars about 4" (10 cm) across: one on the nose above the window, one at the top of each side post beside the window, and one 10" (25 cm) lower on the left post. The STAR marks on the templates show each spot. Leave the rest of the rocket cardboard brown, like the photo.

PIECES USED IN THIS STEP

10

STEP 10: QUALITY CHECK

The astronaut walks in from the back and waves through the window. The rocket stands without tipping, the fins touch the floor, the flame is bold on the booster box, and the 4 stars are bright. Compare to the cover photo. That's the standard.
