CARDBOARD ROCKET SHIP

Life-Size Sit-In Rocket — Your Kid Is the Astronaut

Build a rocket your kid stands inside. Stars, flames, and blastoff sounds extra.

AGES 3–10	BOXES 2–3 Large Boxes	TIME 1–2 Hours	DIFF Beginner *	PIECES 5 pcs
CARDBOARD NEEDED: 2–3 Large Boxes (at least 24" × 36" (61 × 91 cm) each)				
MISSION GOAL: Build a standing rocket ship the child stands inside: nose cone, 4 fins, cockpit cut-out, bold flames at base.				

ROCKET BODY (FULL BOX)

18" x 48" (46 x 122 cm) | Cut x1

CUT COCKPIT OPENING — U-shape at chest height. Adult only.

18" x 48" (46 x 122 cm)
Keep box sealed — child stands inside

MARK LEGEND FOR THIS PIECE:

ARCH — cut a curved arch opening as shown

NOTE: Keep box sealed — child stands inside

NOSE CONE TRIANGLE

x4

**HOW TO DRAW THIS SHAPE ON YOUR CARDBOARD:**

Mark the centre of the top edge. Draw straight lines from there to both bottom corners.

Cut along the GOLD dashed outline. The faint grey box is the flat piece of cardboard it comes from; the grid squares are 2".

14" × 20" (36 × 51 cm)

Triangle — full-width base, point at the top

MARK LEGEND FOR THIS PIECE:

GOLD OUTLINE — this is the shape you cut. It is NOT a rectangle.

FOLD — score lightly, then fold at this line

NOTE: All 4 identical — tape into cone

FIN

10" × 14" (25 × 36 cm) | Cut ×4

CUT

FIN

x4

0" 4" 8"

4" 8" 12"

FOLD 2" TAB at base — mounting tab. Tape to rocket bottom.

HOW TO DRAW THIS SHAPE ON YOUR CARDBOARD:
Mark 3.6" in from each TOP corner. Draw straight lines from those marks down to the bottom corners.

Cut along the GOLD dashed outline. The faint grey box is the flat piece of cardboard it comes from; the grid squares are 2".

10" × 14" (25 × 36 cm)
Swept fin — wide base, narrow angled top

MARK LEGEND FOR THIS PIECE:

GOLD OUTLINE — this is the shape you cut. It is NOT a rectangle.	FOLD — score lightly, then fold at this line
--	--

NOTE: Wide base, angled point — mount 90° apart

COCKPIT RING STRIP

24" × 6" (61 × 15 cm) | Cut ×1

CUT
x1

MARK LEGEND FOR THIS PIECE:

FOLD — score lightly, then fold at this line

NOTE: Frame around cockpit opening

FLAME PANEL

8" x 12" (20 x 30 cm) | Cut x4

CUT
x4

MARK LEGEND FOR THIS PIECE:

CUT — scissors or box cutter on this line

NOTE: Jagged top edge — paint red/orange/yellow

WHAT YOU NEED — CARDBOARD ROCKET SHIP

CARDBOARD PIECES — 5 TOTAL (2–3 Large Boxes (at least 24" × 36" (61 × 91 cm) each))

×1 **Rocket Body (full box)**
18" × 48" *Keep box sealed — child stands inside*

×4 **Nose Cone Triangle**
14" × 20" *All 4 identical — tape into cone*

×4 **Fin**
10" × 14" *Wide base, angled point — mount 90° apart*

×1 **Cockpit Ring Strip**
24" × 6" *Frame around cockpit opening*

×4 **Flame Panel**
8" × 12" *Jagged top edge — paint red/orange/yellow*

TOOLS & SUPPLIES

+ 2–3 large cardboard boxes (refrigerator/appliance size ideal)

+ Box cutter — ADULT USE ONLY

+ Packing tape

+ Yellow, red, orange markers or paint

+ Gold or silver star stickers OR draw with marker

+ Black marker for details

FUN FACT!

The Saturn V rocket was 363 feet tall. Yours is 4 feet. Per foot, yours cost way less to build.

CHALLENGE!

Mission challenge: count down from 10 as a family. On blastoff — EVERYONE jumps!

1

STEP 1: SET UP THE BODY

Keep one large box sealed and closed. Stand it upright. It should reach the child's shoulders when they step inside. See the (arch) mark on the Rocket Body template — that's where the cockpit opening goes.

PIECES USED IN THIS STEP

2

STEP 2: CUT THE COCKPIT OPENING

! ADULT ASSIST NEEDED

On the front of the rocket body, cut the U-shaped cockpit opening shown on the template — base at the child's waist, top arches to their chin. This is where the astronaut stands with arms out.

SAFETY: Adult cuts the U-shape only. No sharp inward points on the cut edge.

PIECES USED IN THIS STEP

3

STEP 3: BUILD THE NOSE CONE

Cut all 4 Nose Cone Triangles identically (14" (36 cm) base × 20" (51 cm) tall). Take 2 triangles and tape along their matching long edges — fold tabs at the base (mark on template). Add the other 2 the same way. You have a 4-sided pyramid cone. Tape every seam.

PIECES USED IN THIS STEP

4

STEP 4: MOUNT THE NOSE CONE

! ADULT ASSIST NEEDED

Place the cone on top of the rocket body. Tape the folded base tabs to all 4 sides of the box top. Reinforce inside the cone at every corner seam.

SAFETY: One person holds cone straight, one tapes. Must be centered or the rocket leans.

PIECES USED IN THIS STEP

5

STEP 5: ATTACH THE FINS

Each Fin has a fold tab at the base (mark on template). Fold the tab outward. Position 4 fins at 90° intervals around the bottom of the rocket body. Tape each tab firmly to the outside of the box.

PIECES USED IN THIS STEP

6

STEP 6: ADD FLAMES

Cut the jagged flame top edge on each Flame Panel (mark on template). Attach all 4 Flame Panels at the base between the fins. Paint red at the top, orange in the middle, yellow at the tips. These are the launch flames.

PIECES USED IN THIS STEP

7

STEP 7: PAINT STARS

Draw/paint gold and yellow stars across the entire rocket body. Add a mission name on the side. Add a round porthole near the top.

PIECES USED IN THIS STEP

8

STEP 8: QUALITY CHECK

Child steps inside. Fins stable — rocket doesn't tip. Nose cone straight. Flames bold at the base. Stars on the body. Cockpit opening frames the child. Compare to cover photo. That's the standard.

PIECES USED IN THIS STEP

**QUALITY CHECK!**

Does your build match the cover photo? Compare side by side before you call it done.
